Adding JavaScript directly to a HTML file. The first way to add JavaScript to HTML is a direct one. You can do so by using the `<script></script>` tag that should encompass all the JS code you write. JS code can be added: between the `<head>` tags; between the `<body>` tags; Depending on where you add the code the JavaScript in your HTML file, the loading will differ. The recommended practice is to add it in the `<head>` section so that it stays separated from the actual content of your HTML file.
