This brings us to where IBM Integration Bus (IIB) fits in. With the ability to connect directly to the IBM MessageSight appliance IIB provides the integration tools required to provide connectivity between the pervasive internet devices and intranet back-end systems, plus a whole lot more. IBM Integration Bus v9

~~IBM Integration Bus V9~~ ~~IBM Developer~~
IBM Integration Bus v9 provides new functionality that makes it easier for IBM Business Process Manager (BPM) users to connect to synchronous services by providing a method for an IBM BPM Integration Service interface definition to be used to generate an IBM Integration Bus integration service. IBM Integration Bus can also help IBM BPM users to access asynchronous infrastructure by providing the connectivity and event message generation necessary.

~~IBM Integration Bus V9 – IBM Developer~~
IBM Integration Bus version 9.0 introduces the ability to propagate client SSL certificate information into a message flow. This article describes how information stored in the SSL certificate can be used to perform authorisation checks on the client. This enables an administrator to allow authenticated clients to access a subset of message flows. Topics covered include:

~~IBM Integration Bus V9 – IBM Developer~~
IBM Integration Bus is a compatible evolution of WebSphere Message Broker that is designed to incorporate features that are found in WebSphere Enterprise Service Bus. IBM Integration Bus supports: A wide range of protocols: WebSphere® MQ, JMS 1.1, HTTP and HTTPS, web services (SOAP and REST), File, Enterprise Information Systems (including SAP and

IBM Integration Bus V9 (IBM IB) has new functionality to facilitate integration with IBM Business Process Manager Standard (IBM BPM). For IBM BPM business process definitions (BPDs) that require access to synchronous services, the IBM BPM user can simply define the interface (input and output business objects) and export that definition to IBM IB for implementation.

A Chef cookbook was created and published on the ot4i-cookbooks repository on github in October 2013, to simplify the provisioning of Linux images running Integration Bus v9.0. The cookbook has just been updated to support deployment of v9 Fixpack 1 images, using the latest Developer Edition download which is now at Fixpack 1 level. This Developer Edition update includes some new function (see Infocenter) as well as fixes to known problems detailed in the v9 README.
