A stark departure from traditional philology, *What is Authorial Philology?* is the first comprehensive treatment of authorial philology as a discipline in its own right. It provides readers with an excellent introduction to the theory and practice of editing 'authorial texts' alongside an exploration of authorial philology in its cultural and conceptual architecture. The originality and distinction of this work lies in its clear systematization of a discipline whose autonomous status has only recently been recognised (at least in Italy), though its roots may extend back as far as Giorgio Pasquali. This pioneering volume

offers both a methodical set of instructions on how to read critical editions, and a wide range of practical examples, expanding upon the conceptual and methodological apparatus laid out in the first two chapters. By presenting a thorough account of the historical and theoretical framework through which authorial philology developed, Paola Italia and Giulia Raboni successfully reconceptualize the authorial text as an ever-changing organism, subject to alteration and modification. *What is Authorial Philology?* will be of great didactic value to students and researchers alike, providing readers with a fuller understanding of the rationale behind different editing practices, and addressing both traditional and newer methods such as the use of the digital medium and

Spanning the whole Italian tradition from Petrarch to Carlo Emilio Gadda, this groundbreaking volume provokes us to consider important questions concerning a text 's dynamism, the extent to which an author is ' agentive ' , and, most crucially, about the very nature of what we read.

Brill's Companion to Theocritus offers an up-to-date guide to a thorough understanding of Theocritus ' literary output. Exploring his corpus from a variety of novel perspectives, it presents a detailed account of the intricacy of Theocritus ' poetic art.

The available material in English discussing Latin American anarchism tends to be fragmentary, country-specific, or focused on single individuals. This new translation of Ángel Cappelletti's wide-ranging, country-by-country historical overview of anarchism's social and political achievements in fourteen Latin American nations is the first book-length regional history ever published in English. With a foreword by the translator. Ángel J. Cappelletti (1927–1995) was an Argentinian philosopher who taught at Simon Bolivar University in Venezuela. He is the author of over forty works primarily investigating philosophy and anarchism. Gabriel Palmer-

Hellenistic poets of the third and second centuries BC were concerned with the need both to mark their continuity with the classical past and to demonstrate their independence from it. In this revised and expanded translation of *Muse e modelli: la poesia ellenistica da Alessandro Magno ad Augusto*, Greek poetry of the third and second centuries BC and its reception and influence at Rome are explored allowing both sides of this literary practice to be appreciated. Genres as diverse as epic and epigram are considered from a historical perspective, in the full range of their deep-level structures, providing a different perspective on

The classic work that redefined the sociology of knowledge and has inspired a generation of philosophers and thinkers In this seminal book, Peter L. Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society. Unlike earlier theorists and philosophers, Berger and Luckmann go beyond intellectual history and focus on commonsense, everyday knowledge—the proverbs, morals, values, and beliefs shared among ordinary people. When first published in 1966, this systematic, theoretical treatise introduced the term social construction, effectively creating a new thought and

Italian Modernism was written in response to the need for an historiographic and theoretical reconsideration of the concepts of Decadentismo and the avant-garde within the Italian critical tradition. Focussing on the confrontation between these concepts and the broader notion of international modernism, the essays in this important collection seek to understand this complex phase of literary and artistic practices as a response to the epistemes of philosophical and scientific modernity at the end of the nineteenth century and in the first three decades of the twentieth. Intellectually provocative, this collection is the first attempt in the
