enhancement to the 802.15.4 standard is ZigBee, which is a standard of the ZigBee Alliance.

The organization maintains, supports, and develops more sophisticated protocols...

~~What 's The Difference Between~~

Read PDF Ieee 802154 And Zigbee As Enabling

~~IEEE 802.15.4 And ZigBee ...~~

This is where the ZigBee Alliance comes into play. ZigBee starts with the 802.15.4 standard, and is currently defining "application profiles" that will allow devices manufactured by different companies to talk to one another.

Read PDF Ieee 802154 And Zigbee As Enabling

For example, the ZigBee "Lighting Profile" will define all the protocols so you can purchase a ZigBee light switch from company A and know that it will work properly with lights manufactured by company B.

~~The difference between ZigBee~~

Read PDF Ieee 802154 And Zigbee As Enabling

~~and IEEE 802.15.4~~

ZigBee is a protocol that uses the 802.15.4 standard as a baseline and adds additional routing and networking functionality. The ZigBee protocol was developed by the ZigBee Alliance.
