The iMac G5 is an all-in-one personal computer that was designed, manufactured and sold by Apple Computer, Inc. from August 2004 to March 2006. It is the final iMac to use a PowerPC processor, making it the last model that could natively run Mac OS 9 applications. It was replaced in January 2006 by the Intel-based iMac, which retained the features, price, and case design of the iMac G5.

The Power Mac G5 is a series of personal computers designed, manufactured, and sold by Apple Computer, Inc. from 2003 to 2006 as part of the Power Mac series. When introduced, it was the most powerful computer in Apple's Macintosh lineup, and was marketed by the company as the world's first 64-bit desktop computer. It was also the first desktop computer from Apple to use an anodized aluminum alloy enclosure, and one of only three computers in Apple's lineup to utilize the PowerPC 970 CPU ...

The iMac G5 was originally released in August 2004. It uses a PowerPC 970 processor which Apple dubbed the iG5.ⓘ The all-in-one machine uses the same display found in the previous iMac G4, but all the internals of the G5 are inside a rectangular case just behind the display. The main body of the machine is held up with a curved aluminum foot, a piece of design language that stuck around in the product line for many years.
