The International Casting Defect Atlas gives a specific code/category to defects based on appearance. It also suggests foundry personnel be aware that most casting defects are due to the interaction of several process variables rather than one factor, such as temperature or gating system design.

5 Steps to Identify Casting Defects | Casting Source

International Atlas of Casting Defects. by Mervin T. Rowley (Author, Editor), null (Illustrator) 2.0 out of 5 stars 1 rating. ISBN-13: 978-0874330533. ISBN-10: 087433053X. Why is ISBN important? ISBN. This bar-code number lets you verify that you're getting exactly the right version or edition of a book.

International Atlas of Casting Defects: Mervin T. Rowley —

Some of the casting defects are described below: 1. Surface Roughness: Too coarse a moulding sand or when pouring temperature is high leads to rough or pebbly surfaces on castings. In steel castings, roughness is produced due to occurrence of surface reaction at mould-metal interface in which iron is oxidised and iron oxide reacts with silica to forms rough compound.

Type of Casting Defects + Metals + Industries + Metallurgy

The most widely used publications include Investment Casting Handbook, a must buy for process and product engineers alike, and the Atlas of Defects, which contains information critical to the reduction of scrap and rework in investment foundries.

ICI Publications—Investment Casting Institute | Montvale, NJ

Class participants will learn to: Name the four most common casting defects and identify the causes and potential solutions for each. Apply a 10-step procedure to correctly identify actual casting defects (in samples) and their root causes, and determine appropriate corrective actions and solutions using the AFS-CIATF (International Atlas of Casting Defects) and the three AFS Casting Defects handbooks.

Casting Defect Analysis | American Foundry Society

The International Atlas of Casting Defects (Rowley, 1974) describes 30 different types of defects, which are generally applicable to gray iron castings produced in sand molds.
