Remarkable change is the new reality of International Business. The accelerating cross-border flow of products, services, capital, ideas, technology and people are driving businesses--large and small--to internationalise. International Business 1st Australasian edition: the New Realities is a rigorous resource which motivates and prepares future managers to operate in multi-national settings, by delivering a teaching system that works. Based on the authors' collective teaching and working experience-as well as discussions with practitioners, students, and faculty staff-this is a complete teaching and learning system where cases, exercises and management skill builders are seamlessly integrated and matched to the topics in each chapter. Case studies from a wide variety of markets relevant to Australasian businesses, including ASEAN countries (e.g. Singapore, Malaysia, Indonesia) as well as China, India, Japan, South Korea, Pakistan, Europe and the Middle East, provide a real-world perspective to theories and examine the latest trends in international business. For undergraduate students majoring in international business or post-graduate courses in international business.

This volume addresses the strategic, structural and functional implications of international business in firms around the world. This is exhibited through a critical, integrated flow from chapter to chapter

Whether it's bungee jumping in Queenstown or visiting the Guinness factory in Dublin, where we travel - and what we do when we get there - has changed significantly in the past twenty years. This innovative textbook explores what is possibly the most unrecognized of international service industries, placing tourism in the context of contemporary globalization and trade-in services. It provides new perspectives on tourism as a form of international business, and the implications for firms, the state and individuals. Split into four separate sections, with introductions outlining the key themes in each, it examines important topics such as: the role of governance and regulation in tourism services the effects of increased global mobility on tourism entrepreneurship how tourism businesses are becoming internationalized why other business sectors are increasingly interested in tourism. Case studies are used throughout to highlight important issues, from developments in the aviation industry to the rise of working holidays. This book gets to the core of a crucial service industry, and is essential reading for any researcher or student of tourism or international business.

Climate change has become an important topic on the business agenda with strong pressure being placed on companies to respond and contribute to finding solutions to this urgent problem. This text provides a comprehensive analysis of international business responses to global climate change and climate change policy. Embedded in relevant management literature, this book gives a concise treatment of developments in policy and business activity on global, regional and national levels, using examples and systematic data from a large number of international companies. The first part outlines the international climate policy landscape and voluntary initiatives taken by companies, both alone and together with others. The second part examines companies' strategies, covering innovation for climate change, as well as compensation via emissions trading and carbon offsetting. Written by well-known experts in the field, International Business and Global Climate Change illustrates how an environmental topic becomes strategically important in a mainstream sense, affecting corporate decision-making, business processes, products, reputation, advertising, communication, accounting and finance. This is a must-read for academics as well as practitioners concerned with this

issue.

Taking neither an economic approach nor a purely managerial approach to its subject matter, this work offers students an integrated resource on the subject of international business. Its main theme is the process of globalization which the authors address in great detail.

Business travel has become indispensable to the global economy, not only due to its necessity in the maintaining of corporate networks, but also because of the associated economies that cater to the daily requirements of the business traveller. Underlying these developments are concerns over the environmental impact of increasing air travel, which are likely to generate new challenges for the future of business travel. From a team of international experts comes this analysis of the role, nature and effects of modern business travel. Issues addressed include the relationships between airlines and business travellers, the role of mobility in business, and the opportunities and challenges created by mobile workforces. The study combines theoretical advances with comprehensive analysis, and will provoke debate across the social sciences on the nature, organization and space of work in the twenty-first century.

The book offers a clear and accessible introduction to the key dimensions of the business environment, including economic, political, cultural, technological and financial dimensions. The approach is genuinely international, highlighting transitional and developing economies as well as the advanced economies.
