approaches, and topics that
are usually left out of
graduate treatments (the
chapter on balance-of-
payments accounting is a
gem).

An open economy is a type of economy where not only domestic actors but also entities in other countries engage in trade of products. Trade can take the form of managerial exchange, technology transfers, and all kinds of goods and services. It contrasts with a closed economy in which international trade and finance cannot take place. The act of selling goods or services to a foreign

The United States, Australia, Singapore, Switzerland and most EU countries have an open economy characterized by low trade barriers. In the past, New Zealand, Canada and Australia had protectionist policies in place. However, they began to open up in the '80s and '90s, which led to increased revenue and productivity.
