This title is now available in a new format. Refer to Media Studies: A Graphic Guide 9781848311848.

Cultural Studies signals a major academic revolution for the 21st century. But what exactly is it, and how is it applied? It is a discipline that claims not to be a discipline; it is a radical critical approach for understanding racial, national, social and gender identities. "Introducing Cultural Studies" provides an incisive tour through the minefield of this complex subject, charting its origins in Britain and its migration to the USA, Canada, France, Australia and South Asia, examining the ideas of its leading exponents and providing a flavour of its use around the world. Covering the ground from Gramsci to Raymond Williams, postcolonial discourse to the politics of diaspora, feminism to queer theory, technoculture and the media to globalization, it serves as an insightful guide to the essential concepts of this fascinating area of study. It is essential reading for all those concerned with the quickening pulse of old, new and emerging cultures.

The term 'feminism' came into English usage around the 1890s, but women's conscious struggle to resist discrimination and sexist oppression goes much further back. This completely new and updated edition of "Introducing Feminism" surveys the major developments that have affected women's lives from the 17th century to the present day. "Introducing Feminism" is an invaluable reference book for anyone seeking the story of how feminism reconfigured the world for women and men alike.

The media is ubiquitous. Every day we watch hours of TV, listen to the radio, read newspapers and magazines, go to the cinema, sit in front of videos or surf the Web. These information commodities exercise enormous influence and power over all of us. Introducing Media Studies explores the complex relationship between the media, ideology, knowledge and power. It provides a scintillating tour of media history and presents a coherent view of the media industry, media theory and methods in media research. It explains how 'the audience' is constructed and how it in turn interprets the content and meaning of media representation. We also learn how to analyse film, deconstruct advertising and appreciate how TV and the press shape public opinion. The media is a condition of our existence and, in an unprecedented way, the pervading shape of our history. No one can afford to neglect a critical understanding of its omnipresence. Here is an entertaining and informative book, accessible to students and general readers concerned with the increasing power, influence and proliferation of the media.

Bridging theory and practice, this accessible text provides an introduction to fashion from both cultural studies and fashion studies perspectives, and addresses the growing interaction between the two fields. Cultural studies relies on fashion to exemplify change as well as continuity, examine identity and difference, agency and structure, and production and consumption. Fashion, meanwhile, benefits from the interpretative lens of cultural studies; its key concepts, contextual flexibility, and attention to bridging 'high' and 'popular' culture, contemporary and historical perspectives, and diverse identity issues and methodologies. Organised thematically, the book uses a wide range of cross-cultural case studies to explore ethnicity, class, gender and nation through fashion, and explains the ways in which these notions interact and overlap. Drawing on intersectionality theory in feminist theory and cultural studies, Fashion and Cultural Studies is essential reading for students and scholars.

From Plato to Virginia Woolf, Structuralism to Practical Criticism, Introducing Literary Criticism charts the history and development of literary criticism into a rich and complex discipline. Tackling disputes over the value and meaning of literature, and exploring theoretical and practical approaches, this unique illustrated guide will help readers of all levels to get more out of their reading.
