From the sixteenth to early-nineteenth century, four times more Africans than Europeans crossed the Atlantic Ocean to the Americas. While this forced migration stripped slaves of their liberty, it failed to destroy many of their cultural practices, which came with Africans to the New World. In *Working the Diaspora*, Frederick Knight examines work cultures on both sides of the Atlantic, from West and West Central Africa to British North America and the Caribbean. Knight demonstrates that the

knowledge that Africans carried across the Atlantic shaped Anglo-American agricultural development and made particularly important contributions to cotton, indigo, tobacco, and staple food cultivation. The book also compellingly argues that the work experience of slaves shaped their views of the natural world. Broad in scope, clearly written, and at the center of current scholarly debates, *Working the Diaspora* challenges readers to alter their conceptual frameworks about Africans by looking at them as workers who, through the course of the Atlantic slave trade and plantation labor, shaped the development of the Americas in significant ways.

This lively introduction to heterodox economics provides a balanced critique of the standard introductory macroeconomic curriculum. In clear and accessible prose, it explains many of the key principles that underlie a variety of alternative theoretical perspectives (including institutionalist economics, radical economics, Post Keynesian economics, feminist economics, ecological economics, Marxist economics, social economics, and socioeconomics). Because the book's structure parallels the chapters and subject matter presented in a typical introductory macroeconomics textbook, "Reintroducing Macroeconomics" provides readers with a running commentary on the standard approach, while simultaneously introducing them to a broader range of ideas about the causes and appropriate policy responses to a wide range of common economic problems. Although designed primarily as a companion volume for students in introductory economics courses, the book can also be used effectively for more targeted applications that highlight a particular economic issue or approach. It will be of particular interest to students in related disciplines (such as American Studies, anthropology, black studies, environmental studies, gender studies, history, political science, and sociology) who may be required to take introductory economics classes and who are interested in gaining an alternative perspective. By demonstrating the vitality and common ground underlying a

broad spectrum of heterodox approaches, "Reintroducing Macroeconomics" brings alternative perspectives into the classroom in an accessible way that empowers students to think about the economy in new and exciting ways. The text includes end-of-chapter study questions, as well as a detailed note to instructors.

movement led by the charismatic failed priest who calls himself Camilo II, who happens to be his brother-in-law, Randolph has become impatient with his forced retirement from the world of affairs. When the gravely wounded Camilo II is delivered secretly to his Chilean hacienda, Randolph sees an opportunity to correct the mistakes of past revolutionary movements and finish the job begun in Peru to destroy the drug trade. With his old CIA friends Ray Hutchinson and Clothilde Brennan, Randolph and Camilo II devise a plan to create the right rebellion, one that will lead to the second coming of Tawantinsuyu, the pre-Columbian Kingdom of the Sun.
