$B(H)$  is the  $C^*$ - identity:  $\|T^*T\| = \|T\|^2$ .

The proof follows from Cauchy-Schwarz:

if  $\|v\| = 1$ , then  $\|T\| \|T^*v\| \geq \|T^*T\| \|v\|$

$|\langle T^*Tv, v \rangle| = \|Tv\|^2$ . and so by taking the

supremum over all  $v$  we find  $\|T\| \|T^*v\| \geq \|T^*T\| \|v\|$

$\|T^*T\| \geq \|T\|^2$ .
