By Lynne Soraya Living Independently on the Autism ...

Young adults with autism are more likely to live with their parents and least likely to live independently after leaving high school as compared to those with other types of disabilities, researchers say. Only about 17 percent of young adults on the spectrum ages 21 to 25 have ever lived independently. By comparison nearly 34 percent of their peers with intellectual disability have, researchers reported online recently in the journal Autism.

Few Young Adults With Autism Living Independently ...

Living independently, or with reduced support, is often an aspiration for many individuals with learning disabilities and, or difficulties as they prepare and move into adulthood. The current living arrangements for many young people often does not match their wishes or desires with 70% of individuals wanting to change their current living arrangements to increase their independence.
