The Story of Louis Braille There was a time, not long ago, when most people thought that blind people could never learn to read. People thought that the only way to read was to look at words with your eyes. A young French boy named Louis Braille thought otherwise. Blind from the age of three, young Louis desperately wanted to read.

~~Louis Braille: The Boy Who Invented Books for the Blind ...~~

Part 1: 'The Story of Louis Braille' In 1812, in the small village of Coupvray, France, 3-year-old Louis Braille played in his father's harness shop next to the family's house. His father was one of the best harness makers in the area. Mr. Braille also made reins, saddles and collars for the villagers' horses.

~~The Story of Louis Braille | Paths to Literacy~~

The Braille language for the blind was developed by Louis Braille in 1824, when he was just 15 years old. He tweaked it and expanded it after that, but, having been blind himself since the age of 3, he was inspired at a young age to conceive of a way to read and write. Braille consists of a code of 63 characters, each made up of one to six ...

Looks at the childhood of Louis Braille and his creation of the Braille writing system for the blind.

The life of the nineteenth-century Frenchman who invented a system of reading for the blind that is used universally.

A simple biography of the nineteenth-century Frenchman who as a boy created a system by which the blind could read.

A biography of the modest Frenchman who, after being blinded at the age of three, went on to develop a system of raised dots on paper that enabled blind people to read and write.

Examines the life and times of the nineteenth-century Frenchman who developed the system of raised dots by which blind people read and write.

Louis Braille: A Touch of Genius is the first ever, full-color biography to include thirty-one of his extant letters, some written by his own hand, and translated into English for the first time. Three great men were born in the early weeks of January 1809: Abraham Lincoln, Charles Darwin, and Louis Braille. Only one has remained virtually unknown ? the man who invented a means of reading and writing still used today in almost every country in the world, adapted to almost every known language from Albanian to Zulu. Born sighted, Louis Braille accidentally blinded himself at the age of 3. He was lucky enough to be sent to a school for blind children in Paris, one of the first in the world. There, at the age of sixteen, he worked tirelessly on a revolutionary system of finger reading that became braille. He was a talented musician, astute businessman, and genius inventor ? collaborating with another Frenchman to invent the first dot-matrix printer around 1840.

The life of the 19th-century Frenchman who invented an alphabet enabling the blind to read.
