1865 Words | 8 Pages. This study investigates the short-term relationship between the UK stock market index (FTSE 100) and six macroeconomic variables during the period 2000-2013 using a multivariate vector autoregression and Granger causality tests. Variance decomposition and impulse response functions are used to measure the shocks of a variable from the other variables and the Granger causality test is used to investigate the lead-lag relationships among these variables.
