In his highly
anticipated
sequel to *The
Elements*,
Theodore Gray
demonstrates how
the elements of

Read Book

Making

the periodic
table combine to
form the
molecules that
make up our
world.

Everything
physical is made
up of the
elements and the
infinite variety
of molecules
they form when
they combine

Read Book

Making

with each other.

In *Molecules,*

Theodore Gray

takes the next

step in the

grand story that

began with the

periodic table

in his best-

selling book,

The Elements: A

Visual

Exploration of

Every Known Atom

Page 52/87

Read Book

Making

in the Universe.

Here, he
explores through
fascinating

stories and

trademark

stunning

photography the

most

interesting,

essential,

useful, and

beautiful of the

millions of

Read Book

Making

Chemical

structures that
make up every
material in the

world. Gray

begins with an

explanation of

how atoms bond

to form

molecules and

compounds, as

well as the

difference

between organic

Read Book

Making

and inorganic chemistry. He then goes on to explore the vast array of materials molecules can create, including: soaps and solvents; goops and oils; rocks and ores; ropes and fibers;

Read Book

Making

painkillers and
dangerous drugs;
sweeteners;
perfumes and
stink bombs;
colors and
pigments; and
controversial
compounds
including
asbestos, CFCs,
and thimerosal.
Big, gorgeous
photographs, as

Read Book

Making

well as diagrams of the compounds and their chemical bonds, rendered with never before seen beauty, fill the pages and capture molecules in their various states. As he did in *The Elements*, Gray

Read Book

Making

shows us

molecules as

we've never seen
them before.

It's the perfect
book for his

loyal fans

who've been

eager for more

and for anyone

fascinated with

the mysteries of

the material

world.

Read Book

Making

Molecular

This popular science book shows that

chemists do have a sense of humor, and this book is a celebration of the quirky side of scientific nomenclature.

Here, some molecules are

Read Book

Making

shown that have unusual, rude, ridiculous or downright silly names. Written in an easy-to-read style, anyone ? not just scientists ? can appreciate the content. Each molecule is illustrated with a photograph

Read Book
Making
and/or image
that relates
directly or
indirectly to
its name and
molecular
structure. Thus,
the book is not
only
entertaining,
but also
educational.

What are living

Read Book

Making

bodies made of?

Protein modelers
tell us that our
cells are

composed of
millions of
proteins,
intricately
folded molecular
structures on
the scale of
nanoparticles.
Proteins twist
and wriggle as

Read Book

Making

they carry out the activities that keep cells alive. Figuring out how to make these unruly substances visible, tangible, and workable is a challenging task, one that is not readily automated, even

Read Book

Making

by the fastest
computers.

Natasha Myers
explores what

protein modelers
must do to

render three-
dimensional, ato-
mic-resolution
models of these
lively
materials.

Rendering Life
Molecular shows

Read Book

Making

Molecular
Models Lab
With Answers

that protein
models are not
just informed by
scientific data:
model building
entangles a
modeler's entire
sensorium, and
modelers must
learn to feel
their way
through the data
in order to
interpret

Read Book

Making

molecular forms.

Myers takes us
into protein
modeling

laboratories and
classrooms,
tracking how
gesture, affect,
imagination, and
intuition shape
practices of
objectivity.

Asking, 'What is
life becoming in

Read Book

Making
