Running a safe, responsible and profitable business requires us to manage major hazard risks and do everything we can to prevent catastrophic events, including those involving tailings and water storage facilities, chemicals, underground mining and process safety. We identify major hazard risks (low probability, high consequence events) and manage them by verifying controls, conducting external reviews and requiring compliance with standards and procedures – such as our tailings and

Health, Safety & Wellbeing - Rio Tinto
That 1980 tragedy was a grim lesson in how not understanding the risk and not fully appreciating the role of shore management can inflict a major catastrophe. Excluding the technical aspects of the disasters, the similarities with regard to management failures are striking. It is dispiriting that 30 years on, the same factors are being
