2020 Shadow Aero OVERVIEW = Honda Some classics never go out of style. Like your favorite leather jacket, or blue jeans. Or, if we're talking about cruisers, a bike like the 2020 Honda Shadow Aero. Talk about timeless—for thousands of riders, the Aero just looks the way a motorcycle should. Sure, part of that is due to the chrome highlights, the V-twin engine and the swept-back twin exhaust.

A comprehensive and rigorous introduction for graduate students and researchers, with applications in sequential decision-making problems.

ROBETH is a systematized collection of algorithms that allows the computation of a broad class of procedures based on M-estimation and high breakdown point estimation, including robust regression, robust testing of linear hypotheses, and robust covariances. Most of these methods originated at the ETH Zürich (hence the acronym ROBETH). This book describes the computational procedures included in ROBETH. Each chapter, with a few exceptions, consists of three parts: Part 1 is an overview of the theoretical background for the statistical and numerical methods; part 2 is a detailed description of the corresponding FORTRAN subroutines and of the numerical algorithms as they are implemented; part 3 presents the script of several examples concerning the use of ROBETH by means of the S-PLUS interface, including some examples of high level S functions
