New in the critically acclaimed Little People, BIG DREAMS series, discover the incredible life of Maria Montessori, the pioneering teacher and researcher. Maria grew up in Italy at a time when girls didn't receive an equal education to boys. But Maria's mother was supportive of her dreams, and Maria went on to study medicine. She later became an early childhood expert--founding schools with her revolutionary educational theories and changing the lives of many children. This moving book features stylish and quirky illustrations and extra facts at the back, including a biographical timeline with historical photos and a detailed profile of the educator's life. Little People, BIG DREAMS is a best-selling series of books and educational games that explore the lives of outstanding people, from designers and artists to scientists and activists. All of them achieved incredible things, yet each began life as a child with a dream. This empowering series offers inspiring messages to children of all ages, in a range of formats. The board books are told in simple sentences, perfect for reading aloud to babies and toddlers. The hardcover versions present expanded stories for beginning readers. Boxed gift sets allow you to collect a selection of the books by theme. Paper dolls, learning cards, matching games, and other fun learning tools provide even more ways to

make the lives of these role models accessible to children. Inspire the next generation of outstanding people who will change the world with Little People, BIG DREAMS!

Montessori: A Modern Approach has been called the single best book for anyone -- educator, childcare professional, and especially parent -- seeking answers to the questions: What is the Montessori method? Are its revolutionary ideas about early childhood education relevant to today's world? And most important, especially for today's dual-career couples. Is a Montessori education right for my child? Paula Polk Lillard writes both as a trained educator and as a concerned parent -- she has many years as a public school teacher, but it was her enthusiasm for the education her own child experienced in a Montessori school that led her to become a leading voice in the Montessori movement in this country. Her book offers the clearest and most concise statement of the Montessori method of child development and education available today.

This book shares the experiences and insight of a Montessori educator over the course of her 40 years as a Montessori teacher, administrator, school owner, and Montessori teacher trainer. It addresses the need for parents and educators to better understand the Montessori philosophy and to embrace it as a means to solve the problems inherent in the traditional structure of education in the United States. Despite the fact that Dr. Maria Montessori created this method over 100 years ago, most of her discoveries about how children learn and the effect of their environment on their developing brains have only recently been validated by current technology and specialists in brain development. These recent discoveries and the real-world success of numerous high-profile Montessori-educated entrepreneurs have helped the popularity of this educational philosophy. *Turning Education Inside-Out: Confessions of a Montessori Principal* shows the impact that the Montessori experience has on the developing child, clears up misconceptions about exactly what Montessori is, and helps prospective parents determine if Montessori is right for their child. Montessori educators will also find the author's insights into the challenges of successfully implementing the Montessori philosophy into the classroom and school to be helpful in their own journey.

A balanced review of the research on the effects of the Montessori school experience, strengths and weaknesses of the method, its history in the US, and new trends. Annotation copyrighted by Book News, Inc., Portland, OR

"Highly recommended for educators, parents, and moderate feminists who seek inspiration from one of the most accomplished women of this or any other age."—Publishers Weekly
The definitive biography of Maria Montessori—physician, feminist, social reformer, educator, and one of the most admired, influential, and controversial women of the twentieth century. Maria Montessori effected a worldwide revolution in the classroom. She developed a new method of educating the young and inspired a movement that carried it into every corner of the world. This is the story of the woman behind the public figure—her accomplishments, her ideas, and her passions. Montessori broke the mold imposed on women in the nineteenth century and forged a new one, first for herself and eventually for those who came after her. Against formidable odds she became the first woman to graduate from the medical school of the University of Rome and then devoted herself to the condition of children considered uneducable at the time. She developed a teaching method that enabled them to do as well as normal children, a method which then led her to found a new kind of school—the Casa dei Bambini, or House of Children—which gained her worldwide fame and still pervades classrooms wherever young children learn. This biography is not only the story
