Marshall and Swift index A method of
determining the installed equipment cost of a
chemical plant. It is based on average cost
data from nearly 50 industries involving both
process industry and more general industry
equipment costs.

Equipment cost ...

For more than 37 years, chemical-process-industry (CPI) professionals – engineers, managers, and technicians – have used Chemical Engineering 's Plant Cost Index (CEPCI) to adjust process plant construction costs from one period to another. This index – rather, indexes, as it consists of a composite index and eleven sub-indexes – has received such wide acceptance that it has even been written into construction-contract, cost-escalation clauses.
