This book describes a structured sketching methodology to help you create alternative design ideas and sketch them on paper. The Five Design-Sheet method acts as a check-list of tasks, to help you think through the problem, create new ideas and to reflect upon the suitability of each idea. To complement the FdS method, we present practical sketching techniques, discuss problem solving, consider professional and ethical issues of designing interfaces, and work through many examples. Five Design-Sheets: Creative Design and Sketching for Computing and Visualization is useful for designers of computer interfaces, or researchers needing to explore alternative solutions in any field. It is written for anyone who is studying on a computing course and needs to design a computing-interface or create a well-structured design chapter for their dissertation, for example. We do acknowledge that throughout this book we focus on the creation of interactive software tools, and use the case study of building data-visualization tools. We have however, tried to keep the techniques general enough such that it is beneficial for a wide range of people, with different challenges and different situations, and for different applications.

Many families are comprised of the good and the bad, the cherished and the reprehensible, some change, others never intend to. This is the generational saga of the ups and downs of one such Mafia family, the Stanolis. The Stanolis, the third of four novellas in the series, follows the saga of the Stanoli family who originated from Mezzogiorno and Sicily in the first decade of the twentieth-century. Involved in organized crime, they are steeled in learning from the past, and they often find better tomorrows. Filled with tales of crime and murder, as well as love, this story begins in 1932. The Stanolis, by author Dr. Vincent M.M. Galici Sr., deals with the main characters in greater depth in a complex storyline. Incidents and characters, both familiar and new, are reintroduced and advanced. The suspense rages on, and the scenic, historic, psychological, spiritual, and social crescendo continues to build.
