Monte Carlo Modeling for
Electron Microscopy and ...

The Monte Carlo method for electron transport is a semiclassical Monte Carlo approach of modeling semiconductor transport. Assuming the carrier motion consists of free flights interrupted by scattering mechanisms, a computer is utilized to simulate the trajectories of particles as they move across the device under the influence of an electric field using classical mechanics. The

planning for electron beams

Monte Carlo simulation methods for the study of electron beam interaction with solids have been mostly concerned with specimens of simple geometry. In this article, we propose a simulation algorithm for treating arbitrary complex structures in a real sample.

The origins of Quantum Monte Carlo methods are often attributed to Enrico Fermi and Robert Richtmyer who developed in 1948 a mean field particle interpretation of neutron-chain reactions, but the first heuristic-like and genetic type particle algorithm (a.k.a. Resampled or Reconfiguration Monte Carlo methods) for estimating ground state energies of quantum systems (in reduced matrix models) is ...

Modeling. Professor R. Gauvin has spent several years working on the development of new methods to characterize the microstructure of complex materials using electron microscopy with X-Ray microanalysis. The original approach of Professor Gauvin research is to develop Monte Carlo programs to simulate electron scattering in materials in order to correlate X-Ray emission to composition in quantitative X-Ray microanalysis.

simulation are developed from physical models of the electron scattering process--a single scattering program capable of high accuracy but requiring long computation times, and a plural scatter

Monte Carlo Modeling for Electron Microscopy and ...

The electron trajectories are simulated by using a Monte Carlo (or random sampling) method. Each electron enters the solid with a given energy, and its trajectory is followed until it comes to rest or exits the sample. To simulate a beam, the process is repeated for a large number
