When you ride a bike that fits, you get more comfort and better control. You may be used to choosing a bike size based on standover height or seat tube length. While those measurements are still worth considering, it's more important to look at the Reach and Effective Top Tube measurements when comparing mountain bike sizes.

What size mountain bike is best for me? | Trek Bikes (GB)

Stems longer than 60mm have no place on a mountain bike in 2018. Anyone who says they like a long stem is just on a bike that's too short for them and the long stem is a sticking plaster 'cure'. Far better to be on a bike with a sufficiently long reach in the first place. Mountain bikes ideally should have stems between 30mm and 50mm in length.

What mountain bike frame size should I ride? - MBR

As you can see from the chart, mountain bike frames are measured in inches. Sizing goes from about 13-15 inches, which is what someone on the small size might ride, up to 23 inches and above, which is best-suited to a taller rider.
