[Beyond the Pleasure Principle](#) is a 1920 essay by Sigmund Freud that marks a major turning point in his theoretical approach. Previously, Freud attributed most human behavior to the sexual instinct. With this essay, Freud went "beyond" the simple pleasure principle, developing his drive theory with the addition of the death drive, Todestrieb.

The publication of "Beyond the Pleasure Principle" in 1920 marked a crucial turning point in Sigmund Freud's psychoanalytic theory. Up until then Freud infamously held that all human action is based on the sexual drives (the libido or Eros) and the pleasure principle of perusing pleasure while avoiding pain. In "Beyond the Pleasure Principle" Freud suggested that man is also governed by a competing instinctual drive: the death drive (or Thanatos, the Greek god of death).

Repetition compulsion is a psychological phenomenon in which a person repeats an event or its circumstances over and over again. This includes reenacting the event or putting oneself in situations where the event is likely to happen again. This "re-living" can also take the form of dreams in which memories and feelings of what happened are repeated, and even hallucinated.
