Welcome! Kudos on taking the first important step towards prepping up for the Exam! This book is a Question Bank created for the PSM II (Professional Scrum Master II) Examinations. The book contains 350 Questions and Answers which will help you prepare for the PSM II. The Scrum.org Professional Scrum Master II (PSM II) certifications require that students demonstrate their knowledge and understanding of Scrum through a rigorous assessment. The certification is not proof of attendance but is rather proof of Scrum knowledge. This certificate is lifelong, and do not require any additional payments or renewal. This certificate is lifelong, and do not require any additional payments or renewal. Please Note: 1. The Questions and Answers in this book are not a replica nor a replacement of the Open Assessments found at <https://www.scrum.org/>. 2. Based on the guidelines provided by Scrum.org, none of the questions are copied from the Open Assessments found at <https://www.scrum.org/>. If similar questions exist, then it's merely a coincidence. The underlying concepts however are similar if not the same. 3. The Questions which appear in the book (along with the answers) would be different from what you find on the exam. 4. Your feedback is much

appreciated. Please feel free to email ScrumReferenceGuides@gmail.com in case of any questions. The PSM II assessment is structured in a similar way to PSM I. It is comprised of 30 multiple choice questions. You have 90 minutes to complete the assessment and must score 85%+ to achieve the certification. The questions and answer options tend to be longer than PSM I and it takes more time to read and understand. As with all Scrum.org assessments, it is challenging and designed to test your real understanding of Scrum. You are not required to attend an assessment center and can take it from the comfort of your own home. If you don't pass the exam you can pay the exams fees again and retake the exam. Here are the Steps on taking (and passing) the Scrum.org Professional Scrum Master II (PSM II) assessment and gaining certification: 1) If you are very new to Scrum and have never been part of a Scrum team, then I would recommend you take a course. Attend a Scrum.org Professional Scrum Master I or Professional Scrum Product Owner I course. 2) Read the Scrum Guide. 3) Do the Professional Scrum Master Open assessment (<https://www.scrum.org/open-assessments>) until you score close to 100% 3 times in a row. 4) Read the Nexus Guide. 5) Do the Nexus Open assessment (<https://www.scrum.org/open-assessments>) until you score close to 100% 3 times in a row. 6) Go through the Scrum Developer Topics. Do the Developer Open assessment (<https://www.scrum.org/open-assessments>) until you score close to 100% 3 times in a row. 7) Go through all the Scrum.org Learning Paths. 8) A Summary of all of Step 1 through Step 7 can be found in My Book PSM II Quick Reference Guide and Exam Questions book. (ISBN : 978-1-7326579-9-1). You can choose to purchase it. (Optional) 9) Next best preparation for the Professional Scrum Master II (PSM II) is to attend a Scrum.org Professional Scrum Master course. 10) Go through the PSM II Assessments in this book. Make sure you understand the explanations / answers to the questions.

This text, now in the Third Edition, aims to provide students with a clear, well-structured and comprehensive treatment of the theory and applications of operations research. The methodology used is to first introduce the students to the fundamental concepts through numerical illustrations and then explain the underlying theory, wherever required. Inclusion of case studies in the existing chapters makes learning easier and more effective. The book introduces the readers to various models of Operations Research (OR), such as transportation model, assignment model, inventory models, queueing theory and integer programming models. Various techniques to solve OR problems 'faced by managers are also discussed. Separate chapters are devoted to Linear Programming, Dynamic Programming and Quadratic Programming which greatly help in the decision-making process. The text facilitates easy comprehension of topics by the students due to inclusion of:

- Examples and situations from the Indian context.
- Numerous exercise problems arranged in a graded manner.
- A large number of illustrative examples.

The text is primarily intended for the postgraduate students of management, computer applications, commerce, mathematics and statistics. Besides, the undergraduate students of mechanical engineering and industrial engineering will find this book extremely useful. In addition, this text can also be used as a reference by OR analysts and operations managers. **NEW TO THE THIRD EDITION**

- Includes two new chapters: – Chapter 14: Project Management—PERT and CPM – Chapter 15: Miscellaneous Topics (Game Theory, Sequencing and Scheduling, Simulation, and Replacement Models)
- Incorporates more examples in the existing chapters to illustrate new models, algorithms and concepts
- Provides short questions and additional numerical problems for practice in each chapter

The main problems that prevent fast and high-quality document processing in electronic document management systems are insufficient and unstructured information, information redundancy, and the presence of large amounts of undesirable user information. The human factor has a significant impact on the efficiency of document search. An average user is not aware of the advanced option of a query language and uses typical queries. Development of a specialized software toolkit intended for information systems and electronic document management systems can be an effective solution of the tasks listed above. Such toolkits should be based on the means and methods of automatic keyword extraction and text classification. The categorization (or classification) of texts into predefined categories has witnessed a booming interest in the last 10 years due to the increased availability of documents in digital form and the ensuing need to

organize them. Thus, research on keyword extraction, advancements in the field, and possible future solutions is of great importance in current times. Developing a Keyword Extractor and Document Classifier: Emerging Research and Opportunities presents an information extraction mechanism that can process many kinds of inputs, realize the type of text, and understand the percentage of the keywords that has to be stored. This mechanism then supports information extraction and information categorization mechanisms. This module is used to support a text summarization mechanism, which leads—with the help of the keyword extraction module—to text categorization. It employs lexical and information retrieval techniques to extract phrases from the document text that are likely to characterize it and determines the category of the retrieved text to present a summary to the users. This book is ideal for practitioners, stakeholders, researchers, academicians, and students who are interested in the development of a new keyword extractor and document classifier method.
