London 1814. Drake, Duke of Manchester is searching the Marriage Mart for a perfect bride. He wants a woman who is poised, sophisticated, and worthy of the title Duchess. But most of all, he wants a woman who does not want the useless emotion of love. Socially awkward Miss Penelope Clayton isn't meant for marriage. A serious botanist, she has no desire to wed, so being forced by her guardian to participate in the Season to find a husband is torture. She'll never fit in with the ton, especially if they discover she's been pretending to be a man within the scientific community. As

Drake's family makes over Penelope, turning her from naive bluestocking to enchanting debutante, he is put upon to introduce her to society and eligible bachelors. Despite dance lessons and new gowns, Penelope is the opposite of poised and sophisticated as she stumbles from one mishap to the next. Why then, does he find it so hard to resist her? The Marriage Mart Mayhem series is best enjoyed in order.

New thinking is needed on the age-old conundrum of how to connect research and policymaking. Why does a disconnect exist between the research community, which is producing thousands of studies relevant to public policy, and the policy community, which is making thousands of decisions that would benefit from research evidence? The second edition updates community dissonance theory and provides an even stronger, more substantiated story of why research is underutilized in policymaking, and what it will take to connect

researchers and policymakers. This book offers a fresh look into what policymakers and the policy process are like, as told by policymakers themselves and the researchers who study and work with them. New to the second edition:

- The point of view of policymakers is infused throughout this book based on a remarkable new study of 225 state legislators with an extraordinarily high response rate in this hard-to-access population.
- A new theory holds promise for guiding the study and practice of evidence-based policy by building on how policymakers say research contributes to policymaking.
- A new chapter features pioneering researchers who have effectively influenced public policy by engaging policymakers in ways rewarding to both.
- A new chapter proposes how an engaged university could provide culturally competent training

based policy. For instructors, the book is written in a language and style that students find engaging. A topic that many students find mundane becomes germane when they read stories of what policymakers are like, and when they learn of researcher's tribulations and triumphs as they work to build evidence-based policy. To point students to the most important ideas, the key concepts are highlighted in text boxes. For those who desire to engage policymakers, a new chapter summarizes the breakthroughs of several researchers who have been successful at driving policy change. The book provides 12 innovative best practices drawn from the science and practice of engaging policymakers, including insights from some of the best and brightest researchers and science communicators. The book

researchers have discovered for ethical dilemmas that pose themselves at studying disadvantaged, vulnerable and victimized populations. Ethical codes prescribe that the scholar should in all circumstances avoid potential harm, that informed consent is necessary and that the limits of confidentiality should always be respected. However, in the practice of research among women involved in prostitution, illegal immigrant workers, enslaved children, people who sell their organs and all the traffickers thereof, the ethical rules cannot always be followed. This book shows that there is a surprising variety of arguable possibilities in dealing with ethical dilemmas in the field. Authors reflect on concrete experiences from their own fieldwork in a wide variety of settings such as the USA, Singapore, Kosovo and The

Some choose to work on the basis of conscientious partiality, others negotiate the rules with their informants and still others purposely break the rules in order to disclose and damage the exploiters. Researchers may find themselves in a vulnerable position. Their experiences, as presented in this volume, will help field workers, university administrators, representatives of vulnerable groups, philosophers of ethics and most of all students to go into the field well-prepared.
