RELOADING...
You'll recall that we import a library using the import keyword. So just import PIL, and we run this. Documentation is a big help in learning a library. There exists standards that make this process easier. For example, most of the libraries let you check their version using the version attribute. So we go PIL. and then double underscore.

The code is licensed under the BSD license. The source code can be obtained from GitHub, which also hosts the bug tracker. The documentation (which includes installation, quick-start examples, and lots of code recipes) can be read on ReadTheDocs. Packages can be downloaded from PyPI, but reading the installation instructions is more likely to be useful.
