green space and other green features, urban and rural, which can deliver quality of life and environmental benefits for communities. Green infrastructure is not simply an alternative description for conventional open space. It includes parks, open spaces, playing fields, woodlands – and also street trees, allotments, private gardens, green roofs and walls, sustainable drainage systems (SuDS) and soils.

What is green infrastructure? | Town and Country Planning ...

Green infrastructure is a relatively new term that has gained traction in planning over the last 15 years or so, and differs from previous approaches in that the emphasis is on the creation of a coherent network of green and blue features that provide multiple functions, instead of focusing on individual spaces.

Green Infrastructure | Centre for Sustainable Planning and ...

Green Infrastructure (GI) is based on the principle that ‘protecting and enhancing nature and natural processes [...] are consciously integrated into spatial planning and territorial development’. Accordingly, the Green Infrastructure Strategy defines GI as ‘a strategically planned network of natural and semi-natural areas with other environmental features designed and managed to deliver ...

Association

Green infrastructure is a strategically planned network of natural and semi-natural areas with other environmental features designed and managed to deliver a wide range of ecosystem services such as water purification, air quality, space for recreation and climate mitigation and adaptation. This network of green (land) and blue (water) spaces can improve environmental conditions and therefore ...

Green Infrastructure - Environment - European Commission

An Introduction to Policy, Planning and Property Value with Green Infrastructure. Green infrastructure, also referred to as GI, is a catch-all term used to describe the network of natural and semi-natural features within and between villages, towns and cities. GI often varies in scale, from street trees, green roofs and private gardens as well as parks, rivers and woodlands.
