Prehistoric Life
In the species index you will find a great many entries, but don't expect to find just dinosaurs. While there is a great number of dinosaur species on here, you will also find the early arthropods which include sea scorpions bigger than a person. The earliest fish are also here, including the prehistoric sharks that hunted the ocean depths before, during and after the age of giant marine reptiles. The early amphibians and their early reptile ...

The Prehistoric Period—or when there was human life before records documented human activity—roughly dates from 2.5 million years ago to 1,200 B.C. It is generally categorized in three...

The Prehistoric Ages in Order: How Humans Lived Before...

Prehistoric Life. Scientists believe that the earliest stages of human evolution began in Africa about seven million years ago as a population of African apes evolved into three different species: gorillas, chimpanzees, and humans. Some three million years later early humans stood nearly upright and had developed larger brains, about half the size of the modern brain.

Prehistoric Life | Encyclopedia.com

"Prehistoric Life" consists of about 500 richly illustrated colored pages that include many explanatory units of boxed-in text. The book starts with the origin of the Earth, and has separate sections for each of the geological time periods, starting with the Archean, four billion years ago, and ending with the history of our species, Homo sapiens.

Dinosaurs and Prehistoric Life - ThoughtCo

The evolutionary history of life on Earth traces the processes by which living and fossil organisms evolved, from the earliest emergence of life to the present. Earth formed about 4.5 billion years ago (abbreviated as Ga (for gigaannum)) and evidence suggests life emerged prior to 3.7 Ga. ago (Although there is some evidence of life as early as 4.1 to 4.28 Ga, it remains controversial due to ...
