Description : PDF-4698a | This popular text provides a creative synthesis of cognitive-behavioral, relational, affect regulation, mindfulness, and psychopharmacologic approaches to the "real world" treatment of acute and chronic posttraumatic states.

[Pub.06] Download Principles of Trauma Therapy: A Guide to ...

The ability to tolerate emotion (self-soothe; regulate affect) is a primary task of treatment, and accounts for the importance of Phase I. Attempts to `process` trauma in the absence of ability to self-regulate can precipitate overwhelm and re-traumatization. `Processing` of complex trauma is a Stage II task and should not be encouraged in the absence of the foundational self-regulatory work of Phase I.
