In linguistics, prosody is concerned with those elements of speech that are not individual phonetic segments but are properties of syllables and larger units of speech, including linguistic functions such as intonation, tone, stress, and rhythm. Such elements are known as suprasegmentals. Prosody may reflect various features of the speaker or the utterance: the emotional state of the speaker; the form of the utterance; the presence of irony or sarcasm; emphasis, contrast, and focus. It may other

Prosody, the study of all the elements of language that contribute toward acoustic and rhythmic effects, chiefly in poetry but also in prose. The term derived from an ancient Greek word that originally meant a song accompanied by music or the particular tone or accent given to an individual syllable. Greek and Latin literary critics generally regarded prosody as part of grammar; it concerned ...
