Serial Killers | Psychology Today

The psychology of female serial killers. There is a mistaken cultural assumption, say Marissa Harrison and her colleagues, that women are, by their nature, incapable of being serial killers – defined here as murderers of three or more victims, spaced out with at least a week between killings. This misconception, the psychologists warn, is a "deadly mistake".

Serial Killers

Listening to Killers offers an inside look at twenty years' worth of murder files from Dr. James Garbarino, a leading expert psychological witness who listens to killers so that he can testify in court. The author offers detailed accounts of how killers travel a path that leads from childhood innocence to lethal violence in adolescence or adulthood. He places the emotional and moral damage of each individual killer within a larger scientific framework of social, psychological, anthropological, and biological research on human development. By linking individual cases to broad social and cultural issues and illustrating the social toxicity and unresolved trauma that drive some people to kill, Dr. Garbarino highlights the humanity we share with killers and the role of understanding and empathy in breaking the cycle of violence.

This is the first book of its kind that combines state-of-the-art psychological assessment experience with the expertise of a homicide investigator who has tracked some of this country's most notorious serial killers.

Examines the variety of serial killers and explains how they work, why they do what they do, who they are and what makes them kill

As the number of serial killers worldwide has risen steadily - from the emergence of Jack the Ripper in 1888 to Harold Shipman and Ivan Milat, the backpacker killer of the Australian outback - the need to understand mass murder is becoming more urgent. Using privileged access to the world's first National Centre for the Analysis of Violent Crime, Colin Wilson and Donald Seaman bring you this incisive study of the psychology of serial killers and the motives behind their crimes. From childhood traumas to issues of frustration, fear and fantasy, discover what turns an ordinary human being into a compulsive killer.

Criminal Psychology Learn what goes on in the Criminal Mind of a Serial Killer **HALL OF FAME / TOP 10 REVIEWER J. Chambers** Gave this book 4 stars! Scroll down to read his review! Get Inside The Twisted Mind of a Serial Killer! To the untrained eye, a serial killer looks just like any other member of the public. They wear the same clothes, they eat the same food and they go about their daily lives, as any normal person would do. But there is a difference in them, which is unquantifiable; it is the deadly secret that all serial killers hide from the outside world. If they weren't able to conceal this secret so well, many cold-blooded killings could have been prevented. So if we could see deep within their souls and spot the things that made them the way they are, maybe we could stop them from becoming serial killers in the first place. With this book, I aim to get inside the mind of a serial killer, to show what makes them tick and to see if there are any personality traits that are the same across the wide range of different serial killers there have been through time. Finally, I will take a look at the top 5 serial killer personalities and 10 of the most famous serial killers in history. This will give us an insight into the mind of a serial killer and a better understanding of the things that turn people into cold and calculating killing machines... Do you find Serial Killers interesting? Would you like to get a glimpse inside the mind of a serial killer? Then Get this Book NOW! Criminal Psychology: The Criminal Mind of a Serial Killer Related Topics: Dark Psychology, Criminal mind, Criminal profiling, understanding criminals, sociology, criminology, victimology.

This book delves into the twisted psychology of women attracted to some of the most notorious monsters on the planet, giving true crime readers real insight into this phenomena One of the most common reasons given by women who date serial killers is the fact that they 'see' the little boy that the horrible man once used to be, and they believe that they can nurture that kid, hence removing the cruel and harmful nature of the killers and making them amicable again. Known as 'serial killer groupies' or even 'prison groupies' by some, a great number of these women have shown a surprising desire to get connected to the serial killer of their choice. A large number of these women have become directly aligned with these killers, and some have even married these hardened criminals. Groupies will do almost anything to get close to the prisoner that they are attracted to. They give up jobs, family, spend money on him, and even move across country to be in the same town as him. Some SKG's are attracted to the celebrity status they acquire. They go on talk shows to announce their undying love for the serial killer and proclaim that he was not capable of these killings. This book depicts several such cases and you'll meet some of these SKG's. "If you seek to understand or study the unexplainable, this book may be your key to some grasp of what is beyond imagining...why some women love serial killers?" -- (Bernard Lee DeLeo), bestselling author of over twenty-five novels "The obsessed groupies of predators such as Richard Ramirez (The Night Stalker) are just as fascinating as the serial killers they love. Best-selling author RJ Parker offers powerful insights into the needs, motivations and dark desires of women who pursue and sometimes marry the most infamous killers in history. This powerful psychological examination of these women is not to be missed. Well researched, Parker sheds new light on the curious sub-culture of groupies in his new true crime book, SERIAL KILLER GROUPIES" -- (Scott Bonn, PhD) Professor, criminologist and author of Why We Love Serial Killers: The Curious Appeal of the World's Most Savage Murderers

This book brings together an international collection of research literature on the topics of criminal profiling and serial violent crime by integrating the respected insights of both scholars and practitioners from around the globe. It explains etiological factors and psychological mechanisms to reveal criminal motives.

For decades now, serial killers have taken center stage in the news and entertainment media. The coverage of real-life murderers such as Ted Bundy and Jeffrey Dahmer has transformed them into ghoulish celebrities. Similarly, the popularity of fictional characters such as Hannibal "The Cannibal" Lecter or Dexter demonstrates just how eager the public is to be frightened by these human predators. But why is this so? Could it be that some of us have a guesseome fascination with serial killers for the same reasons we might morbidly stare at a catastrophic automobile accident? Or it is something more? In Why We Love Serial Killers, criminology professor Dr. Scott Bonn explores our powerful appetite for the macabre, while also providing new and unique insights into the world of the serial killer, including those he has gained from his correspondence with two of the world's most notorious examples, David Berkowitz ("Son of Sam") and Dennis Rader ("Bind, Torture, Kill"). In addition, Bonn examines the criminal profiling techniques used by law enforcement professionals to identify and apprehend serial predators, he discusses the various behaviors—such as the charisma of the sociopath—that manifest themselves in serial killers, and he explains how and why these killers often become popular cultural figures. Groundbreaking in its approach, Why We Love Serial Killers is a compelling look at how the media, law enforcement agencies, and public perception itself shapes and feeds the "monsters" in our midst.
