Analysts must first define the topic at hand, a task that often can be fraught with politics. Issue framing is a key part of the agenda-setting stage of policy development in which interest groups try to define problems in their own way. The major components of problem analysis include defining the problem, measuring the problem, determining the magnitude of the problem, considering the causes of the problem, setting goals or objectives, and determining what can be done about it.

Political approaches are a final tool of policy analysts, including political feasibility analysis (whether key policy actors support the change), implementation analysis (assessment of how well policy implementation has gone), and program evaluation (a study of policy outcomes). Ethical analysis, the systematic review of ethical concerns of policy proposals, is less frequently performed by policy analysts and instead is often left to the political advocacy community.
