Contemporary Criminological Issues tackles some of today ' s most pressing social issues, from the criminalization of Indigenous peoples to interpersonal violence, border control, and armed conflicts. This book advances cutting-edge theories and methods, with the aim of moving beyond the scholarship that reproduces insecurity and exclusion. The breadth of approaches encompasses much of the current critical criminological scholarship, serving as a counterpoint to the growth of managerial and administrative criminologies and the rise of explicitly exclusionary and punitive state policies and practices with respect to ' crime ' and ' security. ' This edited collection featuring two books, one in English and one in French, includes important contributions to knowledge and public policy by eminent experts and emerging scholars. This book is published in English.

This collection presents new investigations into the role of heritage languages and the correlation between culture and language from a pedagogic and cosmopolitical point of view.

Combining straightforward explanation with scholarly analysis, Law of Evidence introduces students to the full range of topics covered in law of evidence courses, with clarity and depth. Highlighting the context within which the law operates, the textbook maintains an engaging narrative with a strong practical focus. Integrated extracts from key judgments and statutes, as well as academic articles and books, lead students to develop a deeper understanding of the subject, and detailed commentary on these extracts helps students develop the ability to read and analyse case law effectively. Student learning is further supported by numerous visual aids, including diagrams, flowcharts and tables, which illustrate the relationships between principles and provisions and clarify the complex aspects of the law. A companion website with regular updates to the text ensures that students always have the most up-to-date coverage of the law at their fingertips.

Corporate citizenship is a prominent international issue as contemporary corporations are no longer expected to perform financially, but are also expected to have an ethical relationship of responsibility between the corporate itself and the society in which it operates and performs it business activities. Provides an up-to-date theoretical content pertaining to corporate citizenship, providing local and global examples and case studies.

This analytical study examines the function of internal auditing from the viewpoint of its role within organizations and within the economics of societies and governments. Swanson and Marsh place internal auditing in the context of the scientific conceptual framework of Living Systems Theory, and thus provide a basis for a systematic theoretical framework and a theory based on observable, measurable entities. They identify the advantages of using this system to advance the knowledge and understanding of organizations, and also propose a higher level of internal audit functions that can advance modern societies.
