This title provides assistance on legal risk management following environmental incidents such as Fukushima and Deepwater Horizon. It reflects how such incidents have led many governments, international corporations and financial institutions to reassess their approach to safety and environmental risk.

From September 2011 to September 2012, Ambassador Nasser Abdulaziz Al-Nasser of Qatar presided over the 66th session of the "world's parliament" – the United Nations General Assembly. It was a critical moment in international affairs as the UN responded to a range of global challenges, from the world financial crisis to the Arab Spring. In *A Year at the Helm of the General Assembly*, Al-Nasser presents a high-level look inside the organization, assessing its strengths and weaknesses, its successes and struggles. He recounts dramatic moments, such as replacing the Libyan delegation, and a tireless schedule of overseas travel, including joint visits with the Secretary-General to Libya and Somalia. His work takes him from major international summits such as the Conference on Sustainable Development in Rio de Janeiro, Brazil (Rio+20) to the European Parliament, which he was the first General Assembly President to address, to academic institutions from Oxford to Moscow to Morocco. Al-Nasser structures the book as he did his 66th session, around four main themes or "pillars": mediation, UN reform, natural disaster prevention and response, and sustainable development. He offers a wide range of recommendations to intergovernmental institutions, to states, to the public sector, and to individuals. Al-Nasser was determined to leave behind a General Assembly that the people of the world could look up to and depend on. This volume is a testament to all that he accomplished in that regard, and a unique resource for those interested in knowing more
