Abstract. This book provides an overview of reproductive and perinatal epidemiology with the goal of providing the reader with a working knowledge of both the substantive and methodologic issues underlying this exciting avenue of study. A conceptual paradigm for reproductive and perinatal epidemiology is presented to define the field and its spectrum of possible study outcomes, followed by an overview of the relevant sensitive windows for study and substantive and methodologic issues ...

Reproductive and Perinatal Epidemiology - Oxford Scholarship

Description: This course focuses on current research, controversial issues, and methodological problems in the epidemiology of reproductive and perinatal health. Lectures and analyses of research papers present reproductive health issues such as conception and infertility, contraception and hormone supplementation safety including effects on reproductive cancers , as well as perinatal issues such as complications of pregnancy, infections in pregnancy, maternal mortality, adverse pregnancy ...

Reproductive and Perinatal Epidemiology

First Published in 1990, Reproductive and Perinatal Epidemiology reviews topics that are central to reproductive and perinatal epidemiology, as well as the methodological issues surrounding research in maternal and child health. Important topics covered include prenatal care, Sudden Infant Death Syndrome (SIDS), epidemiology of neonatal brain hemorrhage, early pregnancy, methodological issues in drug epidemiology, environmental exposures and reproduction, and occupational exposures and ...

Lecture 10: Epidemiology of LBW, PTB, IUGR I : Dole N, Savitz DA, Hertz-Picciotto I, Siega-Riz AM, McMahon MJ, Buekens P. Maternal stress and preterm birth. Am J Epidemiol. Jan 1 2003;157(1):14-24. Copper et al. The preterm prediction study: Maternal stress is associated with spontaneous preterm birth at less than thirty-five weeks' gestation.

Reproductive and Perinatal Epidemiology : Readings

The Reproductive and Perinatal Epidemiology Program in the Department of Epidemiology and Biostatistics is dedicated to research that will improve reproductive and pregnancy health. Reproductive failures and perinatal complications are prevalent, complex and have limited prevention and treatment options. This research program aims to increase the understanding of underlying mechanisms and multilevel risk factors of common reproductive/perinatal complications in order to improve prevention, ...
