Untitled-1 2 29/10/14 09:42. Cancer is among the leading causes of death worldwide, accounting for 8.2 million deaths in 2012 according to the World Health Organization. According to the same source, it is expected that annual cancer cases will rise from 14 million in 2012 to 22 million by 2030. Research on cancer development, treatment and prevention, as well as basic research in this area, is essential to reduce the burden of this disease.

## Acces PDF Research Paper Of Cancer

In summary, I strongly believe that this paper illustrates extremely well what is wrong with biomedical research. It chooses an isolated association of protein and cancer, selects supporting evidence — all reductionist — and ignores both the contrary specific evidence and the extensive evidence concerning other disease outcomes.
