Beginner sailing texts compare sails to the wings (airfoils) of an airplane and repeat the debunked misconception that low pressure on the top of the wing and high pressure on the bottom of the wing creates lift. This is not the whole story.

Gentry Sailing | Theory and Practice
To deal with both the theory and practice of sailing in such a short space is indeed difficult and it has been most successfully done, in my opinion. This publication may make difficult reading to some but the effort of understanding it completely will be very amply rewarded in increased knowledge and pleasure in sailing boats. ...

Naturally, the next step after mastering the theory would be to gain hands-on experience & practice. Repetition is a mother of all learning. There are key steps you have to do every time you go sailing - to name a few: prepare the boat for departure, consider the conditions (weather, current, crew skill level etc.) and make the right plan for casting off, getting underway, hoisting sails ...

Czesław Antony Marchaj, often known in the West as C.A. Marchaj or Tony Marchaj, was a Polish-British yachtsman and professor whose published scientific studies of the aerodynamics and hydrodynamics of sailing boats have been influential on yacht, sail and rig designers. He was the author of "Sailing Theory and Practice" and approximately 60 other publications on sailing. He was a member of the Royal Institute of Naval Architects, and he was awarded the Silver Medal of The International Sailing
