In *Absent from School*, Gottfried and Hutt offer a comprehensive and timely resource for educators and policy makers seeking to understand the scope, impact, and causes of chronic student absenteeism. The editors present a series of studies by leading researchers from a variety of disciplines that address which students are missing school and why, what roles schools themselves play in contributing to or offsetting patterns of absenteeism, and ways to assess student attendance for purposes of school accountability. The contributors examine school-based initiatives that focus on a range of issues, including transportation, student health, discipline policies, and protections for immigrant students, as well as interventions intended to improve student attendance. Only in the past two or three years has chronic absenteeism become the focus of attention among policy makers, civil rights advocates, and educators. *Absent from School* provides the first critical, systematic look at research that can inform and guide those who are working to ensure that every child is in school and learning every day.

"For students to be successful in school, they first have to be in school." With that simple statement, Jessica Sprick and Randy Sprick launch a compelling case for prioritizing student attendance. This comprehensive guide provides school and district-level administrators and teams with the background information, strategies, and tools needed to implement a multitiered approach to improving attendance and preventing chronic absence. The authors use the results of their work in schools throughout the United States to dispel the myth that educators have little control over student attendance and provide success stories from elementary and secondary schools that have reversed longstanding patterns of absenteeism. Citing extensive research, Sprick and Sprick share details about the shocking prevalence of chronic absence in U.S. schools and its effects on students, teachers, families, and the school community. They explain how to replace punitive approaches to absenteeism with effective methods that begin with universal supports and continue through Tier 2 and Tier 3 interventions for students with more persistent problems. Specifically, they explain how to Build an effective school team to address absenteeism . Create systems to collect accurate data and set priorities. Develop an attendance initiative that generates student enthusiasm as well as staff, parent, and community support. Design and implement strategies that are tailored to specific schoolwide concerns and demographics that reach all students. Equipped with the information and tools presented in this book, educators can ensure wise use of staff and other resources—and create a culture of attendance that is the foundation of successful schools. This book is a copublication of ASCD and Ancora Publishing.

Teachers and governments all agree that if you wish to raise educational standards then it's imperative to improve school attendance, and yet an average of around ten per cent of secondary pupils are missing school on a daily basis. Despite governments around the globe trying to address this situation, any improvements have been negligible and improvements in school attendance have been stubbornly hard to achieve. As an internationally recognised expert on this topic, Professor Ken Reid offers workable, practical solutions to help schools improve attendance and to reduce non-attendance and truancy at government level, school and local authority level, individual pupil level and at the family level. Underpinned by the very latest research, but expanded upon with an accessible, practitioner focus, the issues covered by this topical text include: The causes of non-attendance and truancy Successful interventions and the evidence from research Reflections on the attempts to find national solutions Implementing home-school solutions An agenda for the future Supporting throughout with case-studies and workable solutions to the most demanding of situations, this book will be essential reading for head teachers, deputy head teachers, teachers and any educational professional eager to raise standards for all.

Students who attend preschool regularly are significantly more likely than chronically absent preschoolers, those who missed at least 10 percent of the school year, to be ready for kindergarten and to attend school regularly in later grades. The study, which followed 25,000 three- and four-year-olds served by Chicago Public Schools (CPS) school-based preschool

programs, finds chronic absenteeism is rampant among preschoolers in Chicago. In 2011-2012, almost half of three-year-olds and more than one-third of four-year-olds were chronically absent. This report examines the extent of preschool absenteeism and the reasons preschool students are absent. It also examines the relationship between preschool absences and students' scores on measures of kindergarten readiness in math, letter recognition, and social-emotional development, as well as assessments of second-grade reading fluency. Ultimately, students who miss more preschool have lower kindergarten readiness scores, and students who are chronically absent in preschool are more likely to be chronically absent in kindergarten and have lower second grade reading scores. However, students who enter preschool with the weakest skills benefit the most from regular attendance.

The concept of "funds of knowledge" is based on a simple premise: people are competent and have knowledge, and their life experiences have given them that knowledge. The claim in this book is that first-hand research experiences with families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work. In a time when national educational discourses focus on system reform and wholesale replicability across school sites, this book offers a counter-perspective stating that instruction must be linked to students' lives, and that details of effective pedagogy should be linked to local histories and community contexts. This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms of their strengths and resources, their defining pedagogical characteristics. *Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms* is a critically important volume for all teachers and teachers-to-be, and for researchers and graduate students of language, culture, and education.

Annotation Kearney, a clinical child psychologist at the U. of Nevada, Las Vegas, has written his book mainly with the school psychologist in mind. The problem of school refusal is put into a context in initial chapters which give an overview of the historical literature on school refusal behavior and describe the characteristics of these youth, while also critiquing the classification strategies employed. After introducing a functional model, Kearney summarizes treatment strategies and discusses methods for prevention as well as the reality of extreme cases. Annotation c. Research Paper (undergraduate) from the year 2019 in the subject Communications - Research, Studies, Enquiries, grade: 95, course: Senior High School, language: English, abstract: This is a study on the absenteeism committed by the 4Ps beneficiaries despite the support from the government. Consistent school attendance is critical if students are to build and maintain a foundation for ongoing learning and academic success throughout life. When students are not in attendance, they miss essential instruction, which often cannot be replicated. This case study describes the experiences of five (5) high school students identified with chronic student absenteeism from a purposefully selected junior and senior high 4Ps student beneficiaries of T. National Agricultural School. Through a semi-structured interview process the study sought to understand the reasons of absenteeism of those students identified with chronic student absenteeism, along with the voices of their parents and teachers. The findings reveal that despite the support from the government through the 4Ps fund, students do make absences due to peer influence, financial problem, family concerns, lack of interest and illness. These show a clear manifestation of an existing program that needs a thorough evaluation in coming up with a rational solution to the problem. With the prevailing absenteeism problem among the 4Ps beneficiaries, their academic performance suffered a big blow on their grades prompting them to do some measures to pass the subjects. Hence, to compensate what they have missed, special projects and activities were done to cope with the situation. In light with the findings, teachers should come up with a more serious and strict monitoring mode of attendance of the 4Ps beneficiaries. With this, a strong bond between the parents and the teachers to work together should be developed to closely monitor the students' activities regularly. Likewise, the school should involve the students in academ
