SDPWS 4.3.3.4.1 states that shear distribution to individual shear  
walls in a shear wall line shall provide the same calculated  
deflection,  $\Delta_{sw}$ , in each shear wall. The equal deflection method  
has the basic assumption that the distribution of forces to each wall  
segment will be based on the relative stiffness of each segment. As  
the shear wall segments are connected, when the diaphragm ...
