Book & CD-ROM. Training is an investment for the future, the only foundation on which success can be built. Training delivers excellence in product and performance, elevating a good restaurant into a great one. Training will keep the skills of its employees and management sharp. But in no other industry is its absence or presence as obvious as it is in the food service industry. It is hard to find good,

qualified employees, and even harder to keep them. In addition, unemployment levels are low, and competition for qualified workers is tough. What's the answer? Training! Constant training and re-enforcement keeps employees and management sharp and focused, and demonstrates the company cares enough to spend time and subsequently money on them. And that's precisely what this encyclopaedic book will do for you -- be your new training manager. The first part of the book will teach you how to develop training programs for food service employees, and how to train the trainer. The book is full of training tips, tactics and how-to's that will show you proper presentation, and how to keep learners motivated both during and after the training. The second part of the book details specific job descriptions and detailed job performance skills for every position in a food service operation, from the general manager to dishwasher. There are study guides and tests for all positions. Some of the positions include General Manager, Kitchen Manager, Server, Dishwasher, Line Cook, Prep Cook, Bus Person, Host/Hostess, Bartender, Wine & Alcohol Service, Kitchen Steward, Food Safety, Employee Safety, Hotel Positions, etc. Specific instructions are provided for using equipment as well.

This book by a pioneer generation civil servant is a fascinating and an engaging account of Singapore's spectacular development from a sleepy backwater village to a first world State within a single generation and defying, in the process, all odds against its survival. This story is unique in many ways and starts right at the beginning when Singapore became a self-governing State in 1959, the same year the author entered the civil service. The author's involvement and participation in the detailed planning of pioneering policies, the strategies adopted and their implementation at the ground level by many front line ministries and institutions, in which he has served for more than four decades, have given him a unique hands-on experience and observations derived in working from the inside – in areas ranging from slum clearance to representing the State overseas. The story also details how the cooperation between an honest and visionary leadership and the citizenry created an effective professional, proactive and productive public administration, which excelled in service delivery at home, and enabled the State to punch above its weight globally, overcoming at the same time many political,

economic and security challenges, amongst others, and always ever mindful that nothing in the scheme of things can be taken for granted. The success achieved and the many lessons learnt therefrom have universal application and had attracted global interest. The story is very well illustrated with compelling and illuminating insights and richly complemented by the author's anecdotal observations throughout.

Although India's economy is growing at a steady clip of over 7 per cent a year, job creation is far short of where it needs to be. At the same time, most Indians who are employed are stuck in jobs that don't pay well. Hidden in this tangle is not just a crisis of productivity and skills, but also a lack of employment opportunities for the country's teeming millions. If the issues miring both demand and supply in the job market are not addressed urgently, we are looking at an economy in which over 20 crore people will be in 'bad jobs' or even without jobs by 2025. Why are Indian companies not creating enough jobs? Why do small companies remain small? Will bots take over today's jobs, from the shop floor to the back office? What will salaries of the future look like? Why have successive governments failed in their promises to create more jobs that pay well? Goutam Das explores these questions and more, in this engaging narrative that documents the real stories of workers of all shades across India, from Tiruppur in Tamil

The provision of safe food to airline passengers is now a multi-billion dollar industry worldwide. As the aviation industry continues to grow year on year, so do passenger food service expectations, with increasing demand for wider choice and greater quality. Often neglected and under-regulated, food safety should be of paramount importance amid this growth. In this much needed book Erica Sheward makes a compelling case for better management of food safety for all aspects of the aircraft food supply chain.

This manual contains guidance on food safety standards for the catering industry, developed by the Scottish HACCP Working Group of the Scottish Food Enforcement Liaison Committee on behalf of the Food Standards Agency Scotland. The guidance builds on existing good practice and takes account of the requirements of European food safety legislation which requires that all food businesses apply food safety management procedures based on 'Hazard Analysis and Critical Control
