Entering StartupLand. By: Jeffrey Busgang. Narrated by: Adam Grupper. Free with 30-day trial £7.99/month after 30 days. Cancel anytime Summary. Many professionals aspire to work for a start-up. Executives from large companies view them as models to help them adapt to today's dynamic innovation economy. Yes, start-ups look magical, but they can also be chaotic and inaccessible. Many books are ...

The real story of what it takes to risk it all and go for broke. Conventional wisdom says most startups need to be in Silicon Valley, started by young engineers around a sexy new idea, and backed by VC funding. But as Mikkel Svane reveals in Startupland,

Access Free Startupland

the story of founding Zendesk was anything but conventional. Founded in a Copenhagen loft by three thirty-something friends looking to break free from corporate doldrums, Zendesk Inc. is now one of the hottest enterprise software companies, still rapidly growing with customers in 150 countries. But its success was anything but predestined. With revealing stories both funny and frank, Mikkel shares how he and his friends bravely left secure jobs to start something on their own, how he almost went broke several times, how they picked up themselves and their families to travel across the world to California and the unknown, and how the three friends were miraculously still together for Zendesk's IPO and (still growing) success. Much like Zendesk's mission itself—to remove friction, barriers, and mystery in order to make customer service easier and more approachable—Startupland removes some of the

Access Free Startupland

myths about startups and startup founders. Mikkel's advice, hard-won through experience, often bucks conventional wisdom and entrepreneurial tropes. He shares why failure (whether fast or slow) is awful, why a seemingly boring product or idea can be the most exciting, why giving back to the community is as important as the bottom line. From how to hire right (look for people who are not offended by swearing) to which personas generate the highest response rates, Mikkel answers the most pressing questions from the perspective of someone still in the trenches and willing to share the hard truth, warts and all. While there are books by consultants who tell you how to build businesses, or by entrepreneurs now running billion-dollar businesses, there are few books from people still in the trenches who acutely remember the difficult daily decisions, the thrill (and fears) of the early days, the problems that

Access Free Startupland

scale with growing a business, and the reason why they all went on the adventure in the first place. Startupland is indispensable reading for all entrepreneurs who want to make their ideas the next big thing. The book will inspire and empower you to follow your own dream and create your own story.

Many professionals aspire to work for startups. Executives from large companies view them as models to help them adapt to today's dynamic innovation economy, while freshly minted MBAs see magic in founding something new. Yes, startups look magical, but they can also be chaotic and inaccessible. Many books are written for those who aspire to be founders, but a company only has one or two of those. What's needed is something that deconstructs the typical startup organization for the thousands of employees who

Access Free Startupland

join a fledgling company and do the day-to-day work required to grow it into something of value. Entering StartUpLand is a practical, step-by-step guide that provides an insider's analysis of various startup roles and responsibilities--including product management, marketing, growth, and sales--to help you figure out if you want to join a startup and what to expect if you do. You'll gain insight into how successful startups operate and learn to assess which ones you might want to join--or emulate. Inside this book you'll find: A tour of typical startup roles to help you determine which one might be the best fit for you Profiles of startup executives across many different functions who share their stories and describe their responsibilities A methodology to identify and evaluate startups and position yourself to find the opportunity that's right for you Written by an experienced venture capitalist,

Access Free Startupland

entrepreneur, and Harvard Business School professor, *Entering StartUpLand* will guide you as you seek your ideal entry point into this popular, cutting-edge organizational paradigm.

Budding entrepreneurs face a challenging road. The path is not made any easier by all the clichés they hear about how to make a startup succeed—from platitudes and conventional wisdom to downright contradictions. This witty and wise guide to the dilemmas of entrepreneurship debunks widespread misconceptions about how the world of startups works and offers hard-earned advice for every step of the journey. Instead of startup myths—legends spun from a fantasy version of Silicon Valley—Rizwan Virk provides startup models—frameworks that help make thoughtful decisions about starting, growing, managing, and

Access Free Startupland

selling a business. Rather than dispensing simplistic rules, he mentors readers in the development of a mental toolkit for approaching challenges based on how startup markets evolve in real life. In snappy prose with savvy pop-culture and real-world examples, Virk recasts entrepreneurship as a grand adventure. He points out the pitfalls that appear along the way and offers insights into how to avoid them, sharing the secrets of founding a startup, raising money, hiring and firing, when to enter a market and when to exit, and how to value a company. Virk combines lessons learned the hard way during his twenty-five years of founding, investing in, and advising startups with reflections from well-known venture capitalists and experts. His candid advice makes *Startup Myths and Models* an ideal guide for those readers just embarking on the startup life and those looking for their next adventure.

Access Free Startupland

Entrepreneurs who dream of building the next Amazon, Facebook, or Google can take advantage of one of the most powerful economic engines the world has ever known: venture capital. To do so, you need to woo, impress, and persuade venture capitalists to take a risk on an unproven idea. That task is challenge enough. But choosing the right investor can be harder still. Even if you manage to get backing, you want your VC to be a partner, not some adversary who will undermine your vision in order to make a quick return. Jeffrey Busgang is one of a few people who have played on both sides of this high-stakes game. By his early thirties, he had helped build two successful start-ups-one went public, the other was acquired. Now he draws on his experience and unique perspective on the "other side" as a venture capitalist helping entrepreneurs

Access Free Startupland

bring their dreams to fruition. Bussgang offers detailed insights, colorful stories, and practical advice gathered from his own experience as well as from interviews with dozens of the most successful players on both sides of the game, including Twitter's Jack Dorsey and LinkedIn's Reid Hoffman. He reveals how to get noticed, perfect a pitch, and negotiate a partnership that works for everyone. An insider's guide to the secrets of the world venture capital, *Mastering the VC Game* will prove invaluable for entrepreneurs seeking capital and successful partnerships.

START-UP NATION addresses the trillion dollar question: How is it that Israel-- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than

Access Free Startupland

large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality--all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

If you want salient advice about your startup, you've hit the jackpot with this book. Harvard Business School Professor Tom Eisenmann

Access Free Startupland

annually compiles the best posts from many blogs on technology startup management, primarily for the benefit of his students. This book makes his latest collection available to the broader entrepreneur community. You'll find 72 posts from successful entrepreneurs and venture capitalists, such as Fred Wilson, Steve Blank, Ash Maurya, Joel Spolsky, and Ben Yoskovitz. They cover a wide range of topics essential to your startup's success, including:

- Management tasks: Engineering, product management, marketing, sales, and business development
- Organizational issues: Cofounder tensions, recruiting, and career planning
- Funding: The latest developments in capital markets that affect startups

Divided into 13 areas of focus, the book's contributors explore the metrics you need to run your startup, discuss lean prototyping techniques for hardware, identify costly outsourcing mistakes, provide practical

Access Free Startupland

tips on user acquisition, offer branding guidelines, and explain how a choir of angel investors often will sing different parts. And that's just for starters.

A decade from now, many jobs as we know them may no longer exist, as the industrial revolution of the twentieth century gives way to the technological age of the twenty-first. To succeed in the new startup economy, it will be important to understand the breadth of this change as well as prepare with the right skills. *Startups & the Tech Revolution: The Essential Guide* is the first step toward understanding this new world. This book is meant to help those outside the startup world get a basic understanding of the tech revolution underway by providing a simple yet comprehensive overview of how the system works and how it may impact

Access Free Startupland

individuals, society, and companies. McCann takes readers through every element of the startup ecosystem while providing timely examples of how the tech revolution is changing our world, all in the hopes that you will be better prepared to thrive in the technological age.

The definitive playbook by the pioneers of Growth Hacking, one of the hottest business methodologies in Silicon Valley and beyond. It seems hard to believe today, but there was a time when Airbnb was the best-kept secret of travel hackers and couch surfers, Pinterest was a niche web site frequented only by bakers and crafters, LinkedIn was an exclusive network for C-suite executives and top-level recruiters, Facebook was MySpace's sorry step-brother, and Uber was a scrappy upstart that didn't stand a chance against the

Access Free Startupland

Goliath that was New York City Yellow Cabs. So how did these companies grow from these humble beginnings into the powerhouses they are today? Contrary to popular belief, they didn't explode to massive worldwide popularity simply by building a great product then crossing their fingers and hoping it would catch on. There was a studied, carefully implemented methodology behind these companies' extraordinary rise. That methodology is called Growth Hacking, and it's practitioners include not just today's hottest start-ups, but also companies like IBM, Walmart, and Microsoft as well as the millions of entrepreneurs, marketers, managers and executives who make up the community of Growth Hackers. Think of the Growth Hacking methodology as doing for market-share growth what Lean Start-Up did for product development, and Scrum did for productivity. It involves cross-

Access Free Startupland

functional teams and rapid-tempo testing and iteration that focuses customers: attaining them, retaining them, engaging them, and motivating them to come back and buy more. An accessible and practical toolkit that teams and companies in all industries can use to increase their customer base and market share, this book walks readers through the process of creating and executing their own custom-made growth hacking strategy. It is a must read for any marketer, entrepreneur, innovator or manager looking to replace wasteful big bets and "spaghetti-on-the-wall" approaches with more consistent, replicable, cost-effective, and data-driven results.

Build a world class business with a clear blueprint to success
Entrepreneur: Building Your Business From Start to Success is your
guidebook to achieving entrepreneurial success. Whether you're an

Access Free Startupland

existing business owner seeking to increase your reach, or a budding entrepreneur ready to take the next step, this book provides invaluable guidance from experts who have made it happen time and time again. A simple step-by-step process will help you translate your ideas into effective business plans, raise the capital needed to start and grow your business, build a winning team and leave the competition behind. Drawing upon their experience founding more than 30 companies, the authors share their entrepreneurial wisdom and reveal the real-world techniques that lead to success. With a pragmatic and personal approach, the authors explore the personal characteristics that are vital to achievement; managing stress, withstanding heavy workloads and coping with potential health concerns are subjects often overlooked in the pursuit of business achievement. Addressing the link between

Access Free Startupland

business concerns and personal welfare, the authors offer suggestions on how to most effectively reconcile entrepreneurial drive with personal well-being. Build or revitalise a business with proven methods from two globally-recognized experts in the field Develop an effective business plan to maximise your probability of success Understand funding markets and raise capital necessary to start or grow your business Grow your business by beating the competition and dominating your market Providing invaluable insight into real-world entrepreneurial methods that work, this book arms current and future business leaders with the skills, knowledge and motivation to create the organization of their dreams.

Startupland: Madness, Brilliance and PR Misadventures delves into the startup traits that kill the best PR and marketing strategies-

Access Free Startupland

inertia, ego, a pressure-cooker culture, and a lack of trust, among others. This is also a book about conflict, between reporters and PR people, between startups and the outsiders they hire. It's about why storytelling is so important for startups; a "killer app" is not enough. Tech startups need ink to get mindshare, develop their brand and attract investors and customers in a crowded market. If you never understood PR or think it's a waste of time, read this book to see why startups can do well to invest more time into developing this important business practice.
