## *Speaker Placement Guidelines and Tips | AV Gadgets*

Small speakers should be on stands or a bookshelf so that their tweeters are near your ear level and their backs near to the wall. If they have an air vent on the back, they should be kept at least a few inches from the wall. Tower speakers should be placed about 2' (or more) from the back wall. Avoid corners.

Cardas Room Setup & Speaker Placement Guide. The placement of speakers in a room greatly affects system performance. This guide, written by George Cardas, provides insight into Golden Ratio based system setup.

## *Cardas Room Setup & Speaker Placement Guide*

You should just be able to see either the inside walls (imaginary lines emanating from the Speakers meet behind the listener) or outside walls (lines meet in front of the listener) of the Speakers. Next, you should 'calibrate' the floor with tape as shown in the illustration to help you shift the speaker in small increments, 1/2" or one centimeter markings should be fine.

*WASP: speakers placement [English]*

Precision alignment of the distance between the speakers will be determined by the distance to your listening position, the particular speaker you own and, to a great measure, your own personal preference. I generally prefer to start with an equilateral triangle, the apex of which is located at the listening position and the two speakers forming the base line (here, speakers placed 6' apart would suggest a listening position 6' away), and experiment to produce the best soundstage.

*Stereo Loudspeaker Placement -

Speaker Placement Guide ...*

Stereo outdoor speakers give you good sound in a small area right outside the house. Figure out where you'll put them before you buy. For the best stereo effect, Tony recommends mounting left and right speakers about 10 feet apart. Don't try to cover a bigger space by moving them further

# Online Library Stereo Speaker Placement Guide

apart.

## *Outdoor Speakers System Planning Guide*

The most critical part about the placement of your midrange speaker is its distance from the tweeter. Ideally, the tweeter and the midrange speaker must be placed as close together as possible with a maximum of 2 feet between them being acceptable. Both the tweeter and the midrange speaker should have a direct path to the listener for maximum effect.
