The rapid increase in global services during the last few decades is without doubt one of the most challenging social, cultural, political, and especially economic, forces of our time. Services have supplanted agriculture, manufacturing and resources, as the primary source of international competitive advantage in many countries, providing wealth, employment, and almost unlimited future opportunities for growth, whether in traditional or more innovative forms. This book explores the strategic management of services through an Integrated Services Management Model which links operational, marketing, financial and human resource management functions, within a broad and diverse collection of international, regional, and local service contexts. It contains numerous case examples, student projects and exercises, designed to illustrate common problems and innovative approaches, with a particular focus on the Asia Pacific and Australasian regions.

A definitive new reference on the major failures of American corporate governance at the start of the 21st century. Tracing the market boom and bust that preceded Enron's collapse, as well as the aftermath of that failure, the book chronicles the meltdown in the telecom sector that gave rise to accounting scandals globally. Featuring expert analysis of the Sarbanes-Oxley legislation that was adopted in response to these scandals, the author also investigates the remarkable market recovery that followed the scandals. An exhaustive guide to the collapse of the Enron Corporation and other financial scandals that erupted in the wake of the market downturn of 2000, this book is an essential resource for students, teachers and professionals in corporate governance, finance, and law.
