If the pitch was 12:12, the angle would be 45°. Here's how you would line up the speed square to create that angle. The numbers labeled as common are your pitches, so number 1 would be 1:12, 2 is a 2:12.....ours is 6:12, so tilting the speed square until we get to 6, now you have the right angle you can mark and cut.

Speed® Square - Swanson Tool Company

A Speed® Square (rafter square, rafter angle square, triangle square) is an American, triangular-shaped, carpenters' layout out tool which combines some of the most common functions of a try square, and framing square into one. It is used to make basic measurements and mark lines on dimensional lumber, and may be used as a saw guide for making short 45 and 90 degree cuts.

Speed® Square Archives - Swanson Tool Company

Mark a line, along your protractor scale edge, on which you will measure and mark 1/2 your ridge thickness. (See Figure 4) Alter marking 1/2 the ridge thickness, mark another line, through this mark, parallel to the original top plumb cut line. (See Figure 5) NOTE: For jack rafter lengths, refer to pages 40 thru 44.
