Call your T ajima technician. 3A6. When this error code appears the sensor monitoring the position of the movable knife drive mechanism tells the machine that the knife is out of its resting position. When the knives are not properly closed there is a danger of the needle hitting the movable knife and breaking it off.

What is a 211 error code on a tajima 2  
head emb A 211 is generally caused  
by the degree wheel not resting in the  
"red" zone. This zone indicates the  
machine is in a ready state to start or  
shift. Look at the degree wheel and  
manually move it to the zone (around  
100-110 degrees).
