Developed in partnership with NASA, Invisible Universe introduces students to some of the most awesome astronomical phenomena ever discovered. Students begin by studying the electromagnetic spectrum and come to understand how astronomers study the sky by detecting invisible light. After learning the types and properties of visible and invisible light, students are ready to investigate the massive and violent waves of radiation in space called gamma-ray bursts. Where do they come from—massive black holes, colliding galaxies, supernovas, nebulae &? As with all GEMS guides, Invisible Universe was extensively tested by teachers across the country. It comes with accessible background information for the teacher and clear, step-by-step directions. Alan Gould is author of the GEMS Teacher's Guide The Real Reasons for Seasons. Also available by Alan Gould: The Real Reasons for Seasons PB \$25.50, 0-924886-45-5 CUSA

From sound waves to gravitational waves, and from waves of light to crashing rollers on the ocean, Mike Goldsmith explores the fundamental features shared by all waves in the natural world, and considers the range of phenomena resulting from wave motion,

including reflection, diffraction, and polarization in light, and beats and echoes in sound.

Prentice Hall Physical Science: Concepts in Action helps students make the important connection between the science they read and what they experience every day. Relevant content, lively explorations, and a wealth of hands-on activities take students' understanding of science beyond the page and into the world around them. Now includes even more technology, tools and activities to support differentiated instruction!
