Traditionally, most forms of technical documentation have lacked recognized standards, though this is changing. So far, ISO has published a series of standards related to technical product documentations and these are covered by ICS 01.110. The ones that are not covered by ICS 01.110 are listed in the subsection below.

Technical documentation - Wikipedia
Reading a poorly written technical document is harder, and probably more painful than writing one. It takes a lot of work to create a clear, accurate, engaging piece of technical writing. Thus, in order to make

life a little easier for all parties involved, I am going to share with you the 7 Rules that I follow when creating a piece of technical documentation.

The 7 Rules for Writing World Class Technical Documentation

General Classification. One of the main requirements for a technical document is its orientation for the intended audience. According to the target audience, technical documentation is divided into two main types: Process Documents. These describe the development, testing, maintenance and improvement of systems.

Types of Technical Documentation - ClickHelp

The technical documentation provides information on the design, manufacture, and operation of a product and must contain all the details necessary to demonstrate the product conforms to the applicable requirements. If you are the manufacturer, there are certain rules that must be followed when placing a product on the market; you must:
