This text is designed to introduce undergraduate students to the central concepts of fashion trend analysis and forecasting. Exploring the roles of both consumers and industry personnel as product developers, gatekeepers, and promoters of fashion trends, the book demonstrates how and why forecasting is vital to successful product and brand development. Fashion Trends: Analysis and Forecasting covers a wide range of key topics such as the impact of fashion consumption on the environment, economic development, and socio-cultural change as well as the impact of social responsibility and the digital consumer on current fashion trends. Designed to aid teaching and learning, each chapter includes key words, summaries, engaging case studies, discussion questions, and suggested class activities. Using this book as a guide, students will develop an understanding of the process, methods and influence of trend analysis and forecasting for the fashion business and will be encouraged to think through the core issues creatively. An essential text for students of fashion and design.

Many new or young designers dream of having their own label, but most may not know how to make their dreams a reality and become successful in a competitive marketplace. In her practical guidebook, an experienced fashion designer and entrepreneur provides insight on how to break into the fashion industry, overcome obstacles, create a business, market a brand, and launch a fashion show. Nila Palacios, owner of Nila Palacios Latin Fashion, begins with introspective questions directed at aspiring fashion designers to help identify strengths, weaknesses, a motto, and specific goals. While encouraging designers to stay true to their individuality, passions, and objectives, Palacios provides step-by-step guidance that teaches specifically how to: • Find inspiration and bring it to life through designs; • Look for trends and colors and incorporate them into a collection; • Design sketches, make a pattern, and select and cut fabrics; • Match fabrics with specific styles; • Conduct market research, identify a target market, and find a niche; and • Compile a collection, market a product, choose models, and organize a show. Fashion with Passion provides clear, focused guidance for anyone interested in breaking into the fashion industry and achieving their dreams.

Jörg Igelbrink's study provides the disclosure of a comprehensive explanation approach of the consumers purchase motivation and attitude towards local fashion brands. The structure equation model reveals six direct impacts on the consumers LFB attitude. The author's findings identify a new consumer typology presenting a model of four positive

consumer-attitude-types such as the influencing Realign Performance Advocates. In the research field of consumer behaviour the new consumer typology illustrates both the consumer purchase motivation and derived local fashion brand positioning.

Fashion deals with a world of illusion on the one hand and a hard-bitten, multifaceted and multi-billion pound industry on the other. This stimulating book clarifies how fashion operates on all its levels: the mystery of haute couture is explained, the complexities of ready to wear are simplified, and the power of mass production assessed and evaluated. Fashion terms, their use and meaning are explained in plain words and the complicated stages of design, manufacture and distribution are described in detail. Also included are sections on bespoke tailoring, wholesale menswear, dressmaking, millinery and accessories, the fashion calendar and short biographies on the most influential designers. Every follower of fashion, whether at college or in big business, will welcome the information presented in this book.

Encyclopaedic Dictionary of Textile Terms is a reference dictionary with a short explanation of textile terms in spinning, weaving, processing and garmenting fields.
