Learning Anatomy

Learning anatomy requires an ability to identify structures and their internal relationships and the talent to compile details into a three-dimensional whole, the human body (Pandey and Zimitat 2007).

In a study that focused on how students learn anatomy (Eizenberg 1988) ?ve different approaches were identified: to avoid the task, to memorize

anatomy indicating a deficit in meaningfulness. Variation in approach to learning and contextualization of anatomy are suggested as key-elements in how the students arrive at understanding. This should be acknowledged through careful variation of the integration of anatomy in future design of medical curricula.

Learning the whole anatomy of the human body in one go would be extremely difficult. It helps to break the human body into sections and then to link the sections together at a later date. This will help you to learn the specific sections in enough detail. It can also prevent anatomy from becoming overwhelming.
