statement in all  
of mathematics.

# Get Free The Math Book

In this book,  
Eli Maor reveals  
the full story  
of this

ubiquitous 250  
geometric  
theorem.

Although  
attributed to  
Pythagoras, the  
theorem was  
known to the

Babylonians more  
than a thousand

# Get Free The Math Book

years earlier. Pythagoras may have been the first to prove it, but his proof—if indeed he had one—is lost to us. The theorem itself, however, is central to almost every branch of science, pure or

# Get Free The Math Book

applied. Maor brings to life many of the characters that played a role in its history, providing a fascinating backdrop to perhaps our oldest enduring mathematical legacy.

# Get Free The Math Book

The celebrated mathematician and philosopher Pythagoras left no writings. But what if he had and the manuscript had never been found? Where would it be located? Two mathematicians, one American,

# Get Free The Math Book

one British, set  
out, unbeknownst  
to each other,  
to find the  
missing  
manuscript.

Pythagoras, a  
famous Greek  
scholar,  
mathematician,  
and philosopher,  
formulated a  
proof for a

# Get Free The Math Book

theorem that is named for him—the Pythagorean theorem. This theorem states that in any right triangle, the square of the hypotenuse is equal to the sum of the squares of the other two sides.

# Get Free The Math Book

The Pythagorean theorem for right-angled triangles likely was known long before the time of Pythagoras. It was probably used by the ancient Egyptians to construct the pyramids. The theorem is quite

# Get Free The Math Book

believable  
without rigorous  
proof to anyone  
willing to  
expend a modest  
effort in some  
experimentation.  
One method is to  
draw a number of  
right-angled  
triangles in as  
wide a variety  
as practicable  
and measure all

# Get Free The Math Book

From the sides. It will be determined that, for each triangle drawn, the square of the length of the side opposite the right angle is about equal to the sum of the lengths of the squares of the

# Get Free The Math Book

From two sides.

Another method  
requires the

availability of  
a balance. For

this more  
interesting  
experiment,

construct a  
right-angled

triangle and a  
square on each

side using a  
piece of sheet

# Get Free The Math Book

metal or  
cardboard. Then  
cut out the  
three squares  
and weigh them  
on the balance.  
The square on  
the hypotenuse  
should balance  
the other two.  
Contained within  
this book are  
some rigorous  
proofs and some

# Get Free The Math Book

From interesting perspectives regarding right angles and right-angled triangles. Doubtless, this theorem is one of the most useful concepts in mathematics.

In ancient Greece, young

# Get Free The Math Book

Pythagoras  
discovers a  
special number  
pattern (the  
Pythagorean  
theorem) and  
uses it to solve  
problems  
involving right  
triangles.

As the famous  
Pythagorean  
statement reads,

# Get Free The Math Book

From Number rules  
the universe',  
and its veracity  
is proven in the  
many  
mathematical  
discoveries that  
have accelerated  
the development  
of science,  
engineering, and  
even philosophy.  
A so called ",  
mathematics has

# Get Free The Math Book

From and  
stimulated many  
aspects of human  
innovation down  
through the  
centuries. In  
this book,  
Marcel Danesi  
presents a  
historical  
overview of the  
ten greatest  
achievements in  
mathematics, and

# Get Free The Math Book

dynamically  
explores their  
importance and  
effects on our  
daily lives.  
Considered as a  
chain of events  
rather than  
isolated  
incidents,  
Danesi takes us  
from the  
beginnings of  
modern day

# Get Free The Math Book

From mathematics with  
Pythagoras,  
through the  
concept of zero,  
right the way up

McGraw-Hill  
Companies Using  
the familiar  
Pythagorean  
theorem as the  
main theme the  
authors show the  
power and beauty  
of mathematics  
as we would have  
perhaps wished  
to have seen it  
when we were  
first introduced

# Get Free The Math Book

to this  
ubiquitous  
theorem in our  
school days.  
This book is a  
must read for  
anyone with even  
a small interest  
in mathematics.-

Daniel Jaye,  
principal,  
Bergen County  
Academies,  
Hackensack,

# Get Free The Math Book

The first time  
I have enjoyed  
anything about  
mathematics. -Bob  
Simon, 60  
Minutes  
Correspondent  
Not only is this  
book a very  
valuable  
resource for  
mathematics  
teachers, but it  
is also a book

# Get Free The Math Book

that can  
convince the  
general public  
that there is  
genuine beauty  
in mathematics.  
Perhaps this  
book will help  
bring 'converts'  
to  
mathematics! -Dr.  
Anton Dobart,  
director  
general,

# Get Free The Math Book

Austrian  
Ministry for  
Education, Art  
and Culture It is  
often overheard  
in academic  
environments  
that 'math  
is fun!' This  
little book on  
the Pythagorean  
theorem is  
surely proof  
enough,

# Get Free The Math Book

Especially  
since, like the  
theorem, the fun  
is on almost  
every page. -Leon  
M. Lederman,  
Nobel  
laureate  
The  
Pythagorean  
theorem may be  
the best-known  
equation in  
mathematics. Its  
origins reach

# Get Free The Math Book

back to the  
beginnings of  
civilization,  
and today every  
student  
continues to  
study it. What  
most nonmathemat  
icians don't  
understand or  
appreciate is  
why this simply  
stated theorem  
has fascinated

# Get Free The Math Book

countless  
generations. In  
this  
entertaining and  
informative  
book, veteran  
math educator  
Alfred S.  
Posamentier  
makes the  
importance of  
the Pythagorean  
theorem  
delightfully

# Get Free The Math Book

clear. He begins with a brief history of Pythagoras and the early use of his theorem by the ancient Egyptians, Babylonians, Indians, and Chinese, who used it intuitively long before

# Get Free The Math Book

Pythagoras's name was attached to it. He then shows the many ingenious ways in which the theorem has been proved visually using highly imaginative diagrams. Some of these go back to ancient

# Get Free The Math Book

mathematicians;  
others are  
comparatively  
recent proofs,  
including one by  
the twentieth  
president of the  
United States,  
James A.  
Garfield. After  
demonstrating  
some curious  
applications of  
the theorem,

# Get Free The Math Book

Posamentier then explores the Pythagorean triples, pointing out the many hidden surprises of the three numbers that can represent the sides of the right triangle (e.g, 3, 4, 5 and 5, 12, 13).

# Get Free The Math Book

And many will truly amaze the reader. He then turns to the Pythagorean means (the arithmetic, geometric, and harmonic means). By comparing their magnitudes in a variety of ways, he gives the reader a

# Get Free The Math Book

true  
appreciation for  
these  
mathematical  
concepts. The  
final two  
chapters view  
the Pythagorean  
theorem from an  
artistic point  
of view-namely,  
how Pythagoras's  
work manifests  
itself in music

# Get Free The Math Book

From how the  
Pythagorean  
theorem can  
influence fracta  
ls. Posamentier's  
lucid  
presentation and  
gift for  
conveying the  
significance of  
this key  
equation to  
those with  
little math

# Get Free The Math Book

background will  
inform,  
entertain, and  
inspire the  
reader, once  
again  
demonstrating  
the power and  
beauty of mathem  
atics! Alfred S.  
Posamentier,  
Ph.D. (New York,  
NY), is dean of  
the School of

# Get Free The Math Book

Education and
